CANADA - ECONOMIC OVERVIEW

Canada resembles the US in its market-oriented economic system, pattern of production, and high living standards. Since World War II, the impressive growth of the manufacturing, mining, and service sectors has transformed the nation from a largely rural economy into one primarily industrial and urban. Canada has a large oil and natural gas sector with the majority of crude oil production derived from oil sands in the western provinces, especially Alberta. Canada now ranks third in the world in proved oil reserves behind Venezuela and Saudi Arabia and is the world's seventh-largest oil producer.

The 1989 Canada-US Free Trade Agreement and the 1994 North American Free Trade Agreement (which includes Mexico) dramatically increased trade and economic integration between the US and Canada. Canada and the US enjoy the world's most comprehensive bilateral trade and investment relationship, with goods and services trade totaling more than \$680 billion in 2017, and two-way investment stocks of more than \$800 billion. Over three-fourths of Canada's merchandise exports are destined for the US each year. Canada is the largest foreign supplier of energy to the US, including oil, natural gas, and electric power, and a top source of US uranium imports.

Given its abundant natural resources, highly skilled labor force, and modern capital stock, Canada enjoyed solid economic growth from 1993 through 2007. The global economic crisis of 2007-08 moved the Canadian economy into sharp recession by late 2008, and Ottawa posted its first fiscal deficit in 2009 after 12 years of surplus. Canada's major banks emerged from the financial crisis of 2008-09 among the strongest in the world, owing to the financial sector's tradition of conservative lending practices and strong capitalization. Canada's economy posted strong growth in 2017 at 3%, but most analysts are projecting Canada's economic growth will drop back closer to 2% in 2018.

Publication number: 20140124468

Abstract: The present invention relates to console modules and modular console systems. In one aspect, a console module unit is provided comprising a frame, the frame comprising first and second spaced apart frame sections, each frame section comprising two spaced apart side supports and two spaced apart lateral supports, each lateral support disposed between and forming junctions with corresponding ends of the side supports, and a plurality of cross supports interconnecting the first and second frame sections, wherein at least one of the side, lateral, and cross supports is in the form of an extrusion, the extrusion defining at least one re-entrant channel extending in a direction of its longitudinal axis, the at least one re-entrant channel for receiving at least a portion of a coupler. In another aspect, a modular console system comprising at least two console modules is provided.

Type: Application

Filed: November 7, 2012

Publication date: May 8, 2014

Applicant: EVANS CONSOLES CORPORATION

Inventors: Shannon Lundrigan, Matko Papic, Richard Game, Nick Yaskiw, Paul Lewis

MODULAR CONSOLE FRAME STRUCTURE AND CONSOLE

Publication number: 20180055222

Abstract: According to an aspect, there is provided a frame module for a console. The frame module comprises first and second spaced apart leg frames and respective upper and lower elongated frame sections extending between and interconnecting the first and second leg frames. The frame module may also comprise an intermediate frame section that is horizontally adjustable along the length of the upper and lower frame sections. Two or more frame modules may be connected to form a console frame structure. The console frame structure may comprise at least one pivot connection between the second leg frame of the first frame module and the first leg frame of the second frame module. For each pivot connection, the console frame structure may also include at least one support member pivotably connected to the first and second frame modules by the pivot connection.

Type: Application

Filed: August 25, 2017

Publication date: March 1, 2018

Applicant: Evans Consoles Corporation

Inventors: Richard Game, Matko Papic, Carlos Renderos, Randy Simington

Console module and modular console system
Patent number: 8985716

Abstract: The present invention relates to console modules and modular console systems. In one aspect, a console module unit is provided comprising a frame, the frame comprising first and second spaced apart frame sections, each frame section comprising two spaced apart side supports and two spaced apart lateral supports, each lateral support disposed between and forming junctions with corresponding ends of the side supports, and a plurality of cross supports interconnecting the first and second frame sections, wherein at least one of the side, lateral, and cross supports is in the form of an extrusion, the extrusion defining at least one re-entrant channel extending in a direction of its longitudinal axis, the at least one re-entrant channel for receiving at least a portion of a coupler. In another aspect, a modular console system comprising at least two console modules is provided.

RATING EXPLANATIONS

Credit Rating	Explanation	Rating Comments
A++	Minimum Risk	Business dealings permissible with minimum risk of default
A+	Low Risk	Business dealings permissible with low risk of default
A	Acceptable Risk	Business dealings permissible with moderate risk of default
B	Medium Risk	Business dealings permissible on a regular monitoring basis
C	Medium High Risk	Business dealings permissible preferably on secured basis
D	High Risk	Business dealing not recommended or on secured terms only
NB	New Business	No recommendation can be done due to business in infancy stage
NT	No Trace	No recommendation can be done as the business is not traceable

NB is stated where there is insufficient information to facilitate rating. However, it is not to be considered as unfavourable.

This score serves as a reference to assess SC's credit risk and to set the amount of credit to be extended. It is calculated from a composite of weighted scores obtained from each of the major sections of this report. The assessed factors are as follows:

- Financial condition covering various ratios
- Company background and operations size
- Promoters / Management background
- Payment record
- Litigation against the subject
- Industry scenario / competitor analysis
- Supplier / Customer / Banker review (wherever available)
