MALAYSIA - ECONOMIC OVERVIEW

Malaysia, an upper middle-income country, has transformed itself since the 1970s from a producer of raw materials into a multi-sector economy. Under current Prime Minister NAJIB, Malaysia is attempting to achieve high-income status by 2020 and to move further up the value-added production chain by attracting investments in high technology, knowledge-based industries and services. NAJIB's Economic Transformation Program is a series of projects and policy measures intended to accelerate the country's economic growth. The government has also taken steps to liberalize some services sub-sectors. Malaysia is vulnerable to a fall in world commodity prices or a general slowdown in global economic activity.

The NAJIB administration is continuing efforts to boost domestic demand and reduce the economy's dependence on exports. Domestic demand continues to anchor economic growth, supported mainly by private consumption, which accounts for 53% of GDP. Nevertheless, exports - particularly of electronics, oil and gas, and palm oil - remain a significant driver of the economy. In 2015, gross exports of goods and services were equivalent to 73% of GDP. The oil and gas sector supplied about 22% of government revenue in 2015, down significantly from prior years amid a decline in commodity prices and diversification of government revenues. Malaysia has embarked on a fiscal reform program aimed at achieving a balanced budget by 2020, including rationalization of subsidies and the 2015 introduction of a 6% value added tax. Sustained low commodity prices throughout the period not only strained government finances, but also shrunk Malaysia's current account surplus and weighed heavily on the Malaysian ringgit, which was among the region's worst performing currencies during 2013-17. The ringgit hit new lows following the US presidential election amid a broader selloff of emerging market assets.

Bank Negara Malaysia (the central bank) maintains adequate foreign exchange reserves; a well-developed regulatory regime has limited Malaysia's exposure to riskier financial instruments, although it remains vulnerable to volatile global capital flows. In order to increase Malaysia's competitiveness, Prime Minister NAJIB raised possible revisions to the special economic and social preferences accorded to ethnic Malays under the New Economic Policy of 1970, but retreated in 2013 after he encountered significant opposition from Malay nationalists and other vested interests. In September 2013 NAJIB launched the new Bumiputra Economic Empowerment Program, policies that favor and advance the economic condition of ethnic Malays.

Malaysia signed the 12-nation Trans-Pacific Partnership (TPP) free trade agreement in February 2016, although the future of the TPP remains unclear following the US withdrawal from the agreement. Along with nine other ASEAN members, Malaysia established the ASEAN Economic Community in 2015, which aims to advance regional economic integration.

Other Information:

The Subject is principally engaged in the (as a / as an) manufacturing and trading of radio transceiver and intercoms.

The Subject has state-of-the-art manufacturing equipment such as SMD machineries and sophisticated automatic in-line testing equipment (ATE).

The Subject's products includes CB Marine transceiver, Amateur transceiver and others.

As they understand the changing needs of their valued customers in the international markets, the Subject has set up a Research and Development Department in its plant.

The Subject's vision is to be the world leader in manufacturing a continuous high quality and reliable products.

RECENT DEVELOPMENT

We have checked with the Malaysian National News Agency's (BERNAMA) database, but no latest development was noted in our investigation.

CURRENT INVESTIGATION

Latest fresh investigations carried out on the Subject indicated that :

We have contacted one of the staff from the Subject and she provided some information.

The address provided is incomplete.

FINANCIAL ANALYSIS

Profitability

Turnover	:	Erratic	[2012 - 2016]
Profit/(Loss) Before Tax	:	Increased	[2012 - 2016]
Return on Shareholder Funds	:	Unfavourable	[(26.76%)]
Return on Net Assets	:	Unfavourable	[(25.55%)]

The fluctuating turnover reflects the fierce competition among the existing and new market players. Higher losses before tax during the year could be due to the higher operating costs incurred. The Subject's unfavourable returns on shareholders' funds indicate the management's inefficiency in utilising its assets to generate returns.

Working Capital Control

Stock Ratio	:	Unfavourable	[184 Days]
Debtor Ratio	:	Favourable	[0 Days]
Creditors Ratio	:	Unfavourable	[60 Days]

The Subject could be incurring higher holding cost. As its capital was tied up in stocks, it could face liquidity problems. The favourable debtors' days could be due to the good credit control measures implemented by the Subject. The unfavourable creditors' ratio could be due to the Subject taking advantage of the credit granted by its suppliers. However this may affect the goodwill between the Subject and its suppliers and the Subject may inadvertently have to pay more for its future supplies.

Liquidity

Liquid Ratio	:	Unfavourable	[0.60 Times]
Current Ratio	:	Unfavourable	[1.35 Times]

A low liquid ratio means that the Subject may be facing working capital deficiency. If the Subject cannot obtain additional financing or injection of fresh capital, it may face difficulties in meeting its short term obligations.

Solvency

Interest Cover	:	Unfavourable	[(52.12 Times)]
Gearing Ratio	:	Favourable	[0.05 Times]

The Subject incurred losses in the year. It did not generate sufficient income to service its interest. If the situation does not improve, the Subject may be vulnerable to default in servicing the interest. The Subject was lowly geared thus it had a low financial risk. The Subject was mainly financed by its shareholders' funds and internally generated funds. In times of economic slowdown / downturn, the Subject being a lowly geared company, will be able to compete better than those companies which are highly geared in the same industry.

Overall Assessment :

The Subject's losses increased but its turnover showed a fluctuating trend. This indicate the Subject was slowly losing its market share due to its competitors. Due to its weak liquidity position, the Subject will be faced with problems in meeting all its short term obligations if no short term loan is obtained or additional capital injected into the Subject. The Subject's interest cover was negative, indicating that it did not generate sufficient income to service its interest. If its result does not show impressive improvements or succeed obtaining short term financing or capital injection, it may not be able to service its interest and repay the loans. The Subject as a lowly geared company, will be more secured compared to those highly geared companies. It has the ability to meet all its long term obligations.

Overall financial condition of the Subject : POOR

** Forecast

Based On Manufacturing Production Index

INDUSTRY ANALYSIS

MSIC

CODE

26300 : Manufacture of communication equipment

INDUSTRY TELECOMMUNICATION

:

The 2nd Quarter 2015 financial results of Malaysia's mobile operators are expected to disappoint given weak prepaid reload sales following the confusion in Goods and Services Tax (GST) implementation, while forward guidance could be trimmed due to intensified competition. However, the service revenue growth for Malaysia mobile industry is relatively flat (0.8% higher year-on-year) in first quarter 2015, with strong growth of data revenue offset by falling voice and SMS revenues.

The price war in the local telco sector has begun with all major telcos. The current price war will eventually lead to reduction in other mobile plan rates as well, given that these aggressively-priced entry-level postpaid plans are much more attractive than any prepaid or high-end postpaid plans currently in the market. Overall mobile operators' revenue is expected still be sustained due to higher usage despite the lower rates. However, the margins are likely to be affected by higher operating costs, particularly network and marketing expenses.

With the aim of attaining 75% broadband penetration rate by end of 2015, Malaysia has intensifying its efforts to bridge the existing digital divide between urban and rural populations so that none will be left behind this historic milestone. The government allocated RM1 billion as of 2010 under the National Broadband Initiative to provide more Malaysians, particularly the rural population, with high-speed access to internet. In Malaysia, the usage of smartphones to access internet among urban population has been increasing in the past few years.

There are now 20 million Internet users in Malaysia, but not all are subscribers. Broadband penetration per 100% population was only 31% as at the end of 2014 and 70% for households.

Under budget 2015, the High-Speed Broadband (HSBB) will continue to be implemented in areas of high economic impact, covering state capitals and selected major towns nationwide. A sum of RM2.7 billion will be spent over the next three years to build 1,000 new telecommunication towers and laying of under sea cables. Conclusively, the Malaysian telecommunications industry is expected to stay resilient until year 2016, as people spend more on mobile phone and broadband bills. For increasing number of people, mobile are no longer a "nice-to-have"; it's embedded in their daily lives and integrated into the workplace. Moreover, consumers are starting to see beyond the monthly bill and derive more value from the features, functionality and applications on their devices. With fourth generation (4G) technology rolling out, as well as other technologies to enhance broadband access, along with new devices and services exploiting it, data usage will continue to expand exponentially, and the overall value equation to consumers should move in the same direction. Higher speeds and widespread adoption of mobile also are expected to enable additional traction in vertical markets, especially in banking, mobile payments, automotive telematics and health care. These incremental services will present new opportunities and also drive even more data needs.

OVERALL INDUSTRY OUTLOOK : Marginal Growth

CREDIT RISK EVALUATION & RECOMMENDATION

Incorporated in 1990, the Subject is a Private Limited company, focusing on manufacturing and trading of radio transceiver and intercoms. The Subject has been in business for over two decades. It has built up a strong clientele base and satisfactory reputation will enable the Subject to further enhance its business in the near term. The Subject is expected to enjoy a stable market shares. A paid up capital of MYR 5,000,000 allows the Subject to expand its business more comfortably. With a strong backing from its holding company, the Subject enjoys timely financial assistance should the needs arise.

Over the years, the Subject has penetrated into both the local and overseas market. The Subject has positioned itself in the global market and is competing in the industry. Its stable clientele base will enable the Subject to further enhance its business in the near term. Being a moderate size company, the Subject has a total workforce of 90 employees in its business operations. Overall, we regard that the Subject's management capability is average. This indicates that the Subject has greater potential to improve its business performance and raising income for the Subject.

Due to the challenging market conditions, the Subject's business performance seems to be deteriorating and losses incurred. The Subject has generated an unfavourable return on shareholders' funds indicating that the management was inefficient in utilising its funds to generate return. Due to its weak liquidity position, the Subject may face working capital deficiency in meeting its short term financial obligations if no fresh capital are injected into the Subject. Being a lowly geared company, the Subject is exposed to low financial risk as it is mainly dependent on its internal funds to finance its business needs. Given a positive net worth standing at MYR 7,300,181, the Subject should be able to maintain its business in the near terms.

The Subject's supplier are from both the local and overseas countries. This will eliminates the risk of dependency on deliveries from a number of key suppliers and insufficient quantities of its raw materials. Overall the Subject has a good control over its resources.

The Subject's payment habit is average. With its adequate working capital, the Subject should be able to pay its short term debts.

The industry has reached its maturity stage and only enjoying a marginal growth. The steady growth of the country's economy will further enhance the industry activities. Thus, the Subject's future performance is very much depend on its marketing strategies in order to retain its position in the market.

Based on the above condition, we recommend credit be granted to the Subject normally.

RATING EXPLANATIONS

Credit Rating	Explanation	Rating Comments
A++	Minimum Risk	Business dealings permissible with minimum risk of default
A+	Low Risk	Business dealings permissible with low risk of default
A	Acceptable Risk	Business dealings permissible with moderate risk of default
B	Medium Risk	Business dealings permissible on a regular monitoring basis
C	Medium High Risk	Business dealings permissible preferably on secured basis
D	High Risk	Business dealing not recommended or on secured terms only
NB	New Business	No recommendation can be done due to business in infancy stage
NT	No Trace	No recommendation can be done as the business is not traceable

NB is stated where there is insufficient information to facilitate rating. However, it is not to be considered as unfavourable.

This score serves as a reference to assess SC's credit risk and to set the amount of credit to be extended. It is calculated from a composite of weighted scores obtained from each of the major sections of this report. The assessed factors are as follows:

- Financial condition covering various ratios
- Company background and operations size
- Promoters / Management background
- Payment record
- Litigation against the subject
- Industry scenario / competitor analysis
- Supplier / Customer / Banker review (wherever available)
