MALAYSIA - ECONOMIC OVERVIEW

Malaysia, an upper middle-income country, has transformed itself since the 1970s from a producer of raw materials into a multi-sector economy. Under current Prime Minister NAJIB, Malaysia is attempting to achieve high-income status by 2020 and to move further up the value-added production chain by attracting investments in high technology, knowledge-based industries and services. NAJIB's Economic Transformation Program is a series of projects and policy measures intended to accelerate the country's economic growth. The government has also taken steps to liberalize some services sub-sectors. Malaysia is vulnerable to a fall in world commodity prices or a general slowdown in global economic activity.

The NAJIB administration is continuing efforts to boost domestic demand and reduce the economy's dependence on exports. Domestic demand continues to anchor economic growth, supported mainly by private consumption, which accounts for 53% of GDP. Nevertheless, exports - particularly of electronics, oil and gas, and palm oil - remain a significant driver of the economy. In 2015, gross exports of goods and services were equivalent to 73% of GDP. The oil and gas sector supplied about 22% of government revenue in 2015, down significantly from prior years amid a decline in commodity prices and diversification of government revenues. Malaysia has embarked on a fiscal reform program aimed at achieving a balanced budget by 2020, including rationalization of subsidies and the 2015 introduction of a 6% value added tax. Sustained low commodity prices throughout the period not only strained government finances, but also shrunk Malaysia's current account surplus and weighed heavily on the Malaysian ringgit, which was among the region's worst performing currencies during 2013-17. The ringgit hit new lows following the US presidential election amid a broader selloff of emerging market assets.

Bank Negara Malaysia (the central bank) maintains adequate foreign exchange reserves; a well-developed regulatory regime has limited Malaysia's exposure to riskier financial instruments, although it remains vulnerable to volatile global capital flows. In order to increase Malaysia's competitiveness, Prime Minister NAJIB raised possible revisions to the special economic and social preferences accorded to ethnic Malays under the New Economic Policy of 1970, but retreated in 2013 after he encountered significant opposition from Malay nationalists and other vested interests. In September 2013 NAJIB launched the new Bumiputra Economic Empowerment Program, policies that favor and advance the economic condition of ethnic Malays.

Malaysia signed the 12-nation Trans-Pacific Partnership (TPP) free trade agreement in February 2016, although the future of the TPP remains unclear following the US withdrawal from the agreement. Along with nine other ASEAN members, Malaysia established the ASEAN Economic Community in 2015, which aims to advance regional economic integration.

OPERATIONS

Products manufactured : FORMWORK SYSTEM FOR CIVIL ENGINEERING CONSTRUCTION

Ownership of premises : OWNED

Total Number of Employees:

YEAR	2018	2017	2016	2015	2014
GROUP COMPANY	N/A	N/A	N/A	N/A	N/A
	600	600	600	600	600

Branch : NO

Other Information:

The Subject is principally engaged in the (as a / as an) manufacturing of formwork system for civil engineering construction.

The Subject is a revolutionary aluminium formwork construction system.

The Subject has many experiences for forming cast in place reinforced concrete building structures. Using this unique system, all walls, floor slabs, columns, beams, stairs, balconies, together with door and window openings are cast in place in a single site based operation.

There are four main elements in the Subject's business, which are design, manufacturing, technical support and safety and environment.

The combination of bespoke software and the experience of the designers, the Subject guarantees the most efficient construction process, incorporating the optimum assembly procedures, economical panel selection and ultimately minimizing capital and operational costs.

RECENT DEVELOPMENT

We have checked with the Malaysian National News Agency's (BERNAMA) database, but no recent development was noted during the time of inspection.

CURRENT INVESTIGATION

Latest fresh investigations carried out on the Subject indicated that :

Telephone Number Provided By : N/A

Latest Financial Accounts : YES

Other Investigations

We have contacted one of the staff from the Subject and she provided some information.

The address provided is incomplete.

The address provided also can be used by the Subject.

FINANCIAL ANALYSIS

Profitability

Return on Shareholder Funds	:	Acceptable	[23.56%]
Return on Net Assets	:	Favourable	[35.08%]

The Subject's management had generated acceptable return for its shareholders using its assets.

Working Capital Control

Stock Ratio	:	Unfavourable	[67 Days]
Debtor Ratio	:	Unfavourable	[66 Days]
Creditors Ratio	:	Unfavourable	[71 Days]

The Subject could be incurring higher holding cost. As its capital was tied up in stocks, it could face liquidity problems. The high debtors' ratio could indicate that the Subject was weak in its credit control. However, the Subject could also giving longer credit periods to its customers in order to boost its sales or to capture / retain its market share. The unfavourable creditors' ratio could be due to the Subject taking advantage of the credit granted by its suppliers. However this may affect the goodwill between the Subject and its suppliers and the Subject may inadvertently have to pay more for its future supplies.

Liquidity

Liquid Ratio	:	Favourable	[1.83 Times]
Current Ratio	:	Favourable	[2.48 Times]

A minimum liquid ratio of 1 should be maintained by the Subject in order to assure its creditors of its ability to meet short term obligations and the Subject was in a good liquidity position. Thus, we believe the Subject is able to meet all its short term obligations as and when they fall due.

Solvency

Interest Cover	:	Acceptable	[3.42 Times]
Gearing Ratio	:	Unfavourable	[1.59 Times]

The Subject's interest cover was slightly low. If there is no sharp fall in its profit or sudden increase in the interest rates, we believe the Subject is able to generate sufficient income to service its interest and repay the loans. The Subject was highly geared, thus it had a high financial risk. The Subject was dependent on loans to finance its business needs. In times of economic downturn and / or high interest rate, the Subject will become less profitable and competitive than other firms in the same industry, which are lowly geared. This is because the Subject has to service the interest and to repay the loan, which will erode part of its profits. The profits will fluctuate depending on the Subject's turnover and the interest it needs to pay.

Overall Assessment :

The Subject was in good liquidity position with its total current liabilities well covered by its total current assets. With its current net assets, the Subject should be able to repay its short term obligations. The Subject had an acceptable interest cover. If there is no sudden sharp increase in interest rate or fall in the Subject's profit, we do believe the Subject is able to generate sufficient cash flow to service its interest payment. The Subject's gearing level was high and its going concern will be in doubt if there is no injection of additional shareholders' funds in times of economic downturn and / or high interest rates.

Overall financial condition of the Subject : STABLE

* Estimate / Preliminary

** Forecast

Based On Manufacturing Production Index

INDUSTRY ANALYSIS

MSIC CODE

25111 : Manufacture of industrial frameworks in metal

INDUSTRY MANUFACTURING

:

The manufacturing sector is forecast to increase 5.3% in year 2018 (2017: 5.5%). Output of export-oriented industries is projected to expand on account of sustained demand for E&E, refined petroleum and woods products. Growth in the domestic-oriented industries is anticipated to remain resilient supported by ongoing construction of infrastructure projects as well as strong demand for consumer products, especially food and transport equipment.

Value added of the manufacturing sector expanded further by 5.8% during the first half of 2017 (January – June 2016: 4.4%) with expansion across a wide range of outputs in both the export- and domestic-oriented industries. During the first eight months, production increased 6.4%, while sales rebounded significantly by 15.6% to RM500.2 billion (January – August 2016: 4%; -0.7%; RM432.8 billion). Output of export-oriented industries rose 6.5% (January – August 2016: 4.3%) led by an upturn in global electronics cycle and further enhanced by strong demand for resource-based products. Meanwhile, domestic-oriented industries expanded 6.2% (January – August 2016: 3.4%) benefiting from vibrant consumption and construction activities.

Within the export-oriented industries, E&E output expanded 9.3% while sales surged 16.3% to RM169.5 billion (January – August 2016: 6.8%; 9%; RM145.8 billion). Growth emanated mainly from the expansion in output of printed circuit boards, semiconductor devices and electronic integrated circuits which strengthened further by 24.4%, 11.9% and 16.9% (January – August 2016: 11.9%; 5.9%; 15%), respectively. This is in line with the trend in global semiconductor sales which is expected to expand 11.5% in 2017, the highest level since 2010. On the contrary, the output of computers and peripheral equipment contracted 7.7% (January – August 2016: 3.1%) as a result of lower demand for notebooks and personal computers following rising preferences for smartphones and tablets. Meanwhile, consumer electronics grew at a moderate pace of 2.6% (January – August 2016: 5.3%) partly due to lower demand for in-car entertainment, portable media players and digital cameras.

Output of wood and wood products grew 7.3% (January – August 2016: 7.8%). The growth was primarily supported by output of sawmilling and planning of wood which expanded 14.7% (January – August 2016: 16.8%) in response to strong demand from Australia, Japan and the US. Meanwhile, production of wooden and cane furniture remained steady at 10.9% (January – August 2016: 10.9%), benefiting from greater adoption of technology and diversification of export markets.

Manufacture of food products rose 11.2%, largely attributed to a significant increase in refined palm oil at 26.1% (January – August 2016: 6.3%; -3.3%), following higher production of CPO. Meanwhile, output of other food products grew 7% supported by production of bread, cakes and other bakery (15.6%) as well as biscuits and cookies (12%) to meet the rising demand from households (January – August 2016: 11.1%; 19.2%; 19.1%).

For the year, the manufacturing sector is projected to expand further by 5.5% (2016: 4.4%) mainly attributed to an upturn in global semiconductor sales as well as higher demand for consumer products and construction materials.

OVERALL INDUSTRY OUTLOOK : Marginal Growth

CREDIT RISK EVALUATION & RECOMMENDATION

Incorporated in 1990, the Subject is a Private Limited company, focusing on manufacturing of formwork system for civil engineering construction. The Subject has been in business for over two decades. It has built up a strong clientele base and satisfactory reputation will enable the Subject to further enhance its business in the near term.

The Subject is expected to enjoy a stable market shares. A paid up capital of MYR 1,000,000 allows the Subject to expand its business more comfortably. With a strong backing from its holding company, the Subject enjoys timely financial assistance should the needs arise.

Over the years, the Subject has established an extensive clientele base in the market. Besides catering to the local market, the Subject has penetrated into other countries. With the contribution of both local and overseas customers, the Subject is likely to be exposed to lower commercial risk. Hence, we believe that the Subject has better business expansion opportunities in the future. The Subject has a steady workforce of 600 personnel to support its business operations. Its future prospects seem to be fairly good as its business operations are running relatively stable. Overall, we regard that the Subject's management capability is average. This indicates that the Subject has greater potential to improve its business performance and raising income for the Subject.

The Subject has generated its turnover of MYR 259,879,408 and it pre tax profit of MYR 13,495,810. Based on the higher profitability, the Subject has generated a favourable return based on its existing shareholders' funds which indicated that the management was efficient in utilising its funds to generate income.. The Subject is in good liquidity position with its current liabilities well covered by its current assets. Hence, it has sufficient working capital to meet its short term financial obligations. The high gearing ratio clearly implied that the Subject was supported by more debt than equity. Thus, the Subject is exposed to high financial risk. Given a positive net worth standing at MYR 54,383,254, the Subject should be able to maintain its business in the near terms.

The Subject's supplier are from both the local and overseas countries. This will eliminate the risk of dependency on deliveries from a number of key suppliers and insufficient quantities of its raw materials. Overall the Subject has a good control over its resources.

The Subject's payment habit is average. With its adequate working capital, the Subject should be able to pay its short term debts.

The industry has reached its maturity stage and only enjoying a marginal growth. The steady growth of the country's economy will further enhance the industry activities. Thus, the Subject's future performance is very much depend on its marketing strategies in order to retain its position in the market.

Based on the above condition, we recommend credit be granted to the Subject promptly.

PROFIT AND LOSS ACCOUNT

RATING EXPLANATIONS

Credit Rating	Explanation	Rating Comments
A++	Minimum Risk	Business dealings permissible with minimum risk of default
A+	Low Risk	Business dealings permissible with low risk of default
A	Acceptable Risk	Business dealings permissible with moderate risk of default
B	Medium Risk	Business dealings permissible on a regular monitoring basis
C	Medium High Risk	Business dealings permissible preferably on secured basis
D	High Risk	Business dealing not recommended or on secured terms only
NB	New Business	No recommendation can be done due to business in infancy stage
NT	No Trace	No recommendation can be done as the business is not traceable

NB is stated where there is insufficient information to facilitate rating. However, it is not to be considered as unfavourable.

This score serves as a reference to assess SC's credit risk and to set the amount of credit to be extended. It is calculated from a composite of weighted scores obtained from each of the major sections of this report. The assessed factors are as follows:

- Financial condition covering various ratios
- Company background and operations size
- Promoters / Management background
- Payment record
- Litigation against the subject
- Industry scenario / competitor analysis
- Supplier / Customer / Banker review (wherever available)
