SINGAPORE - ECONOMIC OVERVIEW

Singapore has a highly developed and successful free-market economy. It enjoys a remarkably open and corruption-free environment, stable prices, and a per capita GDP higher than that of most developed countries. Unemployment is very low. The economy depends heavily on exports, particularly of electronics, petroleum products, chemicals, medical and optical devices, pharmaceuticals, and on Singapore's vibrant transportation, business, and financial services sectors.

The economy contracted 0.6% in 2009 as a result of the global financial crisis, but has continued to grow since 2010. Growth from 2012-2017 was slower than during the previous decade, a result of slowing structural growth - as Singapore reached high-income levels - and soft global demand for exports. Growth recovered to 3.6% in 2017 with a strengthening global economy.

The government is attempting to restructure Singapore's economy to reduce its dependence on foreign labor, raise productivity growth, and increase wages amid slowing labor force growth and an aging population. Singapore has attracted major investments in advanced manufacturing, pharmaceuticals, and medical technology production and will continue efforts to strengthen its position as Southeast Asia's leading financial and technology hub. Singapore is a signatory of the Comprehensive and Progressive Agreement for Trans-Pacific Partnership (CPTPP), and a party to the Regional Comprehensive Economic Partnership (RCEP) negotiations with nine other ASEAN members plus Australia, China, India, Japan, South Korea, and New Zealand. In 2015, Singapore formed, with the other ASEAN members, the ASEAN Economic Community.

FINANCIAL ANALYSIS

Profitability

Turnover	:	Erratic	[2013 - 2017]
Profit/(Loss) Before Tax	:	Decreased	[2013 - 2017]
Return on Shareholder Funds	:	Unfavourable	[6.87%]
Return on Net Assets	:	Unfavourable	[8.90%]

The fluctuating turnover reflects the fierce competition among the existing and new market players. The Subject's profit fell sharply because of the high operating costs incurred. The unfavourable return on shareholders' funds could indicate that the Subject was inefficient in utilising its assets to generate returns.

Working Capital Control

Stock Ratio	:	Favourable	[4 Days]
Debtor Ratio	:	Favourable	[15 Days]
Creditors Ratio	:	Favourable	[13 Days]

DISCLAIMER : This Report is **PRIVATE & CONFIDENTIAL** and it is prepared at the request of and for its use by the Subscriber only. The Subscriber shall use the contents of the Report merely as an aid to its business. Mira Inform Private Limited ("MIPL") has collated information/data in the Report, which have not been verified unless otherwise specifically mentioned in the Report. The Subscriber shall independently verify the accuracy and correctness of the information/data before in any way acting upon the same. MIPL shall not be liable for any harm, injury, loss or damage caused to the Subscriber due to default by the Subscriber's debtors/beneficiaries in fulfilling their obligations of any nature whatsoever. This Report or any of its portion shall not be used as a documentary evidence or otherwise before any investigative agencies or forum of law. This Report is confidential and proprietary to MIPL. The Subscriber and/or any other person(s) may not reproduce, publish or disclose any of the contents of the Report to others without the express authorization of MIPL. This Report is prepared and issued to the Subscriber without any risk, responsibility or liability on the part of MIPL or its officials.

The Subject's stocks were moving fast thus reducing its holding cost. This had reduced funds being tied up in stocks. The favourable debtors' days could be due to the good credit control measures implemented by the Subject. The Subject had a favourable creditors' ratio where the Subject could be taking advantage of the cash discounts and also wanting to maintain goodwill with its creditors.

Liquidity

Liquid Ratio	:	Favourable	[1.94 Times]
Current Ratio	:	Favourable	[2.13 Times]

A minimum liquid ratio of 1 should be maintained by the Subject in order to assure its creditors of its ability to meet short term obligations and the Subject was in a good liquidity position. Thus, we believe the Subject is able to meet all its short term obligations as and when they fall due.

Solvency

Interest Cover	:	Acceptable	[7.74 Times]
Gearing Ratio	:	Favourable	[0.18 Times]

The Subject's interest cover was slightly low. If there is no sharp fall in its profit or sudden increase in the interest rates, we believe the Subject is able to generate sufficient income to service its interest and repay the loans. The Subject was lowly geared thus it had a low financial risk. The Subject was mainly financed by its shareholders' funds and internally generated funds. In times of economic slowdown / downturn, the Subject being a lowly geared company, will be able to compete better than those companies which are highly geared in the same industry.

Overall Assessment :

The Subject recorded lower profits as its turnover showed an erratic trend. The Subject's management was unable to control its costs efficiently as its profit showed a downward trend. The Subject was in good liquidity position with its total current liabilities well covered by its total current assets. With its current net assets, the Subject should be able to repay its short term obligations. The Subject had an acceptable interest cover. If there is no sudden sharp increase in interest rate or fall in the Subject's profit, we do believe the Subject is able to generate sufficient cash flow to service its interest payment. The Subject as a lowly geared company, will be more secured compared to those highly geared companies. It has the ability to meet all its long term obligations.

Overall financial condition of the Subject : STABLE

INDUSTRY ANALYSIS

INDUSTRY : TRADING

According to the Ministry of Trade and Industry, the wholesale & retail trade sector expanded to 3.0% in the fourth quarter of 2017, moderating from the 3.3% growth in the previous quarter. The wholesale trade segment was boosted by an improvement in foreign wholesale sales volume, which more than offset the weakness in domestic wholesale sales volume. For the whole of 2017, the sector expanded by 2.3%, faster than the 1.0% growth in 2016. The improvement in growth can be attributed to the wholesale segment.

The domestic wholesale sales volume fell by 1.1% in the fourth quarter 2017, reversing the 2.0% growth in the preceding quarter. The poorer outturn was led by declines in the sales volume of household equipment & furniture (-27%) and general wholesale merchandise (-19%), which outweighed the increase in the sales volume of telecommunications & computers (20%). For the whole of 2017, the domestic wholesale trade index expanded by 1.0%, a turnaround from the 2.7% decline in 2016.

On the other hand, foreign wholesale sales volume rose to 6.2% in the fourth quarter 2017, a step-up from the 5.1% growth in the preceding quarter. Growth was driven by expansions in the sales of petroleum & petroleum-related products (11%), telecommunications & computers (19%) and electronic components (16%). However, growth was partly offset by a 20% decline in the sales volume of metals, timber & construction materials. For the full year 2017, the foreign wholesale trade index rose by 3.6%, faster than the increase of 1.5% in the previous year.

Besides, retail sales volume rose by 2.1% in the fourth quarter 2017, improving from the 0.9% growth recorded in the third quarter. Growth was supported by improvements in both motor vehicle and non-motor vehicle sales volumes. While motor vehicle sales benefitted from an on-year increase in COE supply, growth in non-motor vehicle sales came on the back of an improvement in consumer sentiments. Notably, the sales volume of discretionary goods such as recreational goods, computer & telecommunication equipment and wearing apparel & footwear grew by 4.6%, 4.3 % and 3.1% respectively.

For the full year 2017, retail sales volume expanded by 1.3%, similar to the 1.5% growth recorded in 2016. Growth was driven by both motor vehicle sales and non-motor vehicle sales, which the former rising by 1.5% and the latter increasing by 1.3%. The rise in non-motor vehicle sales was underpinned by higher sales of discretionary goods. For instance, the sales volume of recreational goods (3.9%), watches & jewellery (2.4%), computer & telecommunications equipment (1.7%) and wearing apparel & footwear (1.5%) improved in 2017.

OVERALL INDUSTRY OUTLOOK : MARGINAL GROWTH

CREDIT RISK EVALUATION & RECOMMENDATION

Incorporated in 2007, the Subject is a Private Limited company, focusing on trading of commodities, agricultural products, fertilizer and its related products. Having been in the industry for over a decade, the Subject has achieved a certain market share and has built up a holding company reputation in the market. It should have received supports from its regular customers. The Subject has a strong capital position of USD 15,000,000 & SGD 31,354,500. We are confident with the Subject's business and its future growth prospect. Having strong support from its holding company has enabled the Subject to remain competitive despite the challenging business environment.

DISCLAIMER : This Report is **PRIVATE & CONFIDENTIAL** and it is prepared at the request of and for its use by the Subscriber only. The Subscriber shall use the contents of the Report merely as an aid to its business. Mira Inform Private Limited ("MIPL") has collated information/data in the Report, which have not been verified unless otherwise specifically mentioned in the Report. The Subscriber shall independently verify the accuracy and correctness of the information/data before in any way acting upon the same. MIPL shall not be liable for any harm, injury, loss or damage caused to the Subscriber due to default by the Subscriber's debtors/beneficiaries in fulfilling their obligations of any nature whatsoever. This Report or any of its portion shall not be used as a documentary evidence or otherwise before any investigative agencies or forum of law. This Report is confidential and proprietary to MIPL. This Report is prepared and issued to the Subscriber without any risk, responsibility or liability on the part of MIPL or its officials.

Over the years, the Subject has penetrated into both the local and overseas market. The Subject has positioned itself in the global market and is competing in the industry. Its stable clientele base will enable the Subject to further enhance its business in the near term. The Subject is operating on a medium scale and it has approximately 32 employees in its business operations. Overall, we regard that the Subject's management capability is average. This indicates that the Subject has greater potential to improve its business performance and raising income for the Subject.

Financially, the Subject registered a higher turnover compared to previous year. However, its profits showed a reverse trend. The lower profit achieved was a result of higher operating cost and increased competition. The Subject has generated an unfavourable return on shareholders' funds indicating that the management was inefficient in utilising its funds to generate return. The Subject is in good liquidity position with its current liabilities well covered by its current assets. Hence, it has sufficient working capital to meet its short term financial obligations. Being a lowly geared company, the Subject is exposed to low financial risk as it is mainly dependent on its internal funds to finance its business needs. Given a positive net worth standing at USD 65,626,963, the Subject should be able to maintain its business in the near terms.

The Subject's supplier are from both the local and overseas countries. This will eliminate the risk of dependency on deliveries from a number of key suppliers and insufficient quantities of its raw materials. Overall the Subject has a good control over its resources.

The Subject's payment habit is average. With its adequate working capital, the Subject should be able to pay its short term debts.

The industry has reached its maturity stage and only enjoying a marginal growth. The steady growth of the country's economy will further enhance the industry activities. Thus, the Subject's future performance is very much depend on its marketing strategies in order to retain its position in the market.

Based on the above condition, we recommend credit be granted to the Subject normally.
