SINGAPORE - ECONOMIC OVERVIEW

Singapore has a highly developed and successful free-market economy. It enjoys an open and corruption-free environment, stable prices, and a per capita GDP higher than that of most developed countries. Unemployment is very low. The economy depends heavily on exports, particularly of electronics, petroleum products, chemicals, medical and optical devices, pharmaceuticals, and on Singapore's vibrant transportation, business, and financial services sectors.

The economy contracted 0.6% in 2009 as a result of the global financial crisis, but has continued to grow since 2010. Growth from 2012-2017 was slower than during the previous decade, a result of slowing structural growth - as Singapore reached high-income levels - and soft global demand for exports. Growth recovered to 3.6% in 2017 with a strengthening global economy.

The government is attempting to restructure Singapore's economy to reduce its dependence on foreign labor, raise productivity growth, and increase wages amid slowing labor force growth and an aging population. Singapore has attracted major investments in advanced manufacturing, pharmaceuticals, and medical technology production and will continue efforts to strengthen its position as Southeast Asia's leading financial and technology hub. Singapore is a signatory of the Comprehensive and Progressive Agreement for Trans-Pacific Partnership (CPTPP), and a party to the Regional Comprehensive Economic Partnership (RCEP) negotiations with nine other ASEAN members plus Australia, China, India, Japan, South Korea, and New Zealand. In 2015, Singapore formed, with the other ASEAN members, the ASEAN Economic Community.

FINANCIAL ANALYSIS

Profitability

Turnover	:	Increased	[1,315.23%]
Profit/(Loss) Before Tax	:	Decreased	[9,028.81%]
Return on Shareholder Funds	:	Unfavourable	[169.16%]
Return on Net Assets	:	Unfavourable	[161.32%]

The increase in turnover could be due to the Subject adopting an aggressive marketing strategy. The Subject incurred losses during the year due to the inefficient control of its operating costs. Although the Subject's returns showed positive figures it is not reflective of the true situation. The Subject incurred losses during the year and its shareholders' funds have turned red. The positive returns on shareholders' funds is the result of losses divided by negative shareholders' funds. The Subject's management was inefficient in utilising the assets to generate returns.

Working Capital Control

Debtor Ratio	:	Favourable	[17 Days]
Creditors Ratio	:	Favourable	[5 Days]

The favourable debtors' days could be due to the good credit control measures implemented by the Subject. The

Subject had a favourable creditors' ratio where the Subject could be taking advantage of the cash discounts and also wanting to maintain goodwill with its creditors.

Liquidity

Liquid Ratio	:	Acceptable	[0.94 Times]
Current Ratio	:	Unfavourable	[0.94 Times]

The Subject's liquid ratio was slightly low. This could indicate that the Subject's working capital was slightly deficient. The Subject will have to improve its liquidity position either by obtaining short term financing or increase its paid up capital so that it can meet all its short term obligations as and when they fall due.

Solvency

Interest Cover	:	Unfavourable	[(20.79 Times)]
Gearing Ratio	:	Unfavourable	[(6.37 Times)]

The Subject incurred losses in the year. It did not generate sufficient income to service its interest. If the situation does not improve, the Subject may be vulnerable to default in servicing the interest. The Subject's gearing was negative during the year as its shareholders' funds was in the red. This means the Subject is running its business using borrowed money. We consider the Subject as facing high financial risks.

Overall Assessment :

Although the Subject's turnover increased its profits however showed a reverse trend. The losses could be due to the management's failure to maintain its competitiveness in the market. The Subject's liquidity was at an acceptable range. If the Subject is able to obtain further short term financing, it should be able to meet all its short term obligations. The Subject's interest cover was negative, indicating that it did not generate sufficient income to service its interest. If its result does not show impressive improvements or succeed obtaining short term financing or capital injection, it may not be able to service its interest and repay the loans. The Subject has high financial risks. If its shareholders do not inject more capital into the company or if its business performance does not improve, its going concern may be in question.

Overall financial condition of the Subject : POOR

INDUSTRY ANALYSIS

INDUSTRY TRADING

:

According to the Ministry of Trade and Industry, the wholesale & retail trade sector expanded to 3.0% in the fourth quarter of 2017, moderating from the 3.3% growth in the previous quarter. The wholesale trade segment was boosted by an improvement in foreign wholesale sales volume, which more than offset the weakness in domestic wholesale sales volume. For the whole of 2017, the sector expanded by 2.3%, faster than the 1.0% growth in 2016. The improvement in growth can be attributed to the wholesale segment.

The domestic wholesale sales volume fell by 1.1% in the fourth quarter 2017, reversing the 2.0% growth in the preceding quarter. The poorer outturn was led by declines in the sales volume of household equipment & furniture (-27%) and general wholesale merchandise (-19%), which outweighed the increase in the sales volume of telecommunications & computers (20%). For the whole of 2017, the domestic wholesale trade index expanded by 1.0%, a turnaround from the 2.7% decline in 2016.

On the other hand, foreign wholesale sales volume rose to 6.2% in the fourth quarter 2017, a step-up from the 5.1% growth in the preceding quarter. Growth was driven by expansions in the sales of petroleum & petroleum-related products (11%), telecommunications & computers (19%) and electronic components (16%). However, growth was partly offset by a 20% decline in the sales volume of metals, timber & construction materials. For the full year 2017, the foreign wholesale trade index rose by 3.6%, faster than the increase of 1.5% in the previous year.

Besides, retail sales volume rose by 2.1% in the fourth quarter 2017, improving from the 0.9% growth recorded in the third quarter. Growth was supported by improvements in both motor vehicle and non-motor vehicle sales volumes. While motor vehicle sales benefitted from an on-year increase in COE supply, growth in non-motor vehicle sales came on the back of an improvement in consumer sentiments. Notably, the sales volume of discretionary goods such as recreational goods, computer & telecommunication equipment and wearing apparel & footwear grew by 4.6%, 4.3 % and 3.1% respectively.

For the full year 2017, retail sales volume expanded by 1.3%, similar to the 1.5% growth recorded in 2016. Growth was driven by both motor vehicle sales and non-motor vehicle sales, which the former rising by 1.5% and the latter increasing by 1.3%. The rise in non-motor vehicle sales was underpinned by higher sales of discretionary goods. For instance, the sales volume of recreational goods (3.9%), watches & jewellery (2.4%), computer & telecommunications equipment (1.7%) and wearing apparel & footwear (1.5%) improved in 2017.

CREDIT RISK EVALUATION & RECOMMENDATION

Incorporated in 2016, the Subject is a Private Limited company, focusing on trading of palm oil and related products. The Subject has been in business for less than 5 years and it has slowly been building up contact with its clients while competing in the industry. However, it has yet to enjoy a stable market shares as it need to compete many well established players in the same field. Presently, the issued and paid up capital of the Subject stands at USD 5,000,000. The Subject does not have strong shareholders' backing. Without a strong shareholders' backing, the opportunity of the Subject to expand its business is limited.

Investigation revealed, the Subject has penetrated into both the local and overseas market. The Subject has positioned itself in the global market and is competing in the industry. Its stable clientele base will enable the

Subject to further enhance its business in the near term. The Subject's business operation is supported by 13 employees. Overall, we regard that the Subject's management capability is average. This indicates that the Subject has greater potential to improve its business performance and raising income for the Subject

Despite the higher turnover, the Subject suffered pre-tax losses which reflected a highly competitive business environment. The Subject has generated an unfavourable return on shareholders' funds indicating that the management was inefficient in utilising its funds to generate return. The Subject managed to maintain an adequate liquidity level, indicating that the Subject has the ability to meet its financial obligations. The Subject has generated an unfavourable gearing ratio indicated that the Subject is in high financial risk. The Subject's unfavourable financial performance over the years has wiped out its shareholders' funds to a deficit of USD - 2,973,260. Therefore, the Subject as a going concern is much dependent on its ability to generate sufficient cash flow and obtain additional financing to meet its future obligations.

The Subject's payment habit is average. With its adequate working capital, the Subject should be able to pay its short term debts.

The industry has reached its maturity stage and only enjoying a marginal growth. The steady growth of the country's economy will further enhance the industry activities. Thus, the Subject's future performance is very much depend on its marketing strategies in order to retain its position in the market.

Based on the above unfavourable condition, we regard granting credit to the Subject to be quite risky. Hence, credit is not recommended.
