| High Risk | C2 |
| Very High Risk | D |

CHINA - ECONOMIC OVERVIEW

Since the late 1970s, China has moved from a closed, centrally planned system to a more market-oriented one that plays a major global role. China has implemented reforms in a gradualist fashion, resulting in efficiency gains that have contributed to a more than tenfold increase in GDP since 1978. Reforms began with the phaseout of collectivized agriculture, and expanded to include the gradual liberalization of prices, fiscal decentralization, increased autonomy for state enterprises, growth of the private sector, development of stock markets and a modern banking system, and opening to foreign trade and investment. China continues to pursue an industrial policy, state support of key sectors, and a restrictive investment regime. From 2013 to 2017, China had one of the fastest growing economies in the world, averaging slightly more than 7% real growth per year. Measured on a purchasing power parity (PPP) basis that adjusts for price differences, China in 2017 stood as the largest economy in the world, surpassing the US in 2014 for the first time in modern history. China became the world's largest exporter in 2010, and the largest trading nation in 2013. Still, China's per capita income is below the world average.

In July 2005 moved to an exchange rate system that references a basket of currencies. From mid-2005 to late 2008, the renminbi (RMB) appreciated more than 20% against the US dollar, but the exchange rate remained virtually pegged to the dollar from the onset of the global financial crisis until June 2010, when Beijing announced it would resume a gradual appreciation. From 2013 until early 2015, the renminbi held steady against the dollar, but it depreciated 13% from mid-2015 until end-2016 amid strong capital outflows; in 2017 the RMB resumed appreciating against the dollar – roughly 7% from end-of-2016 to end-of-2017. In 2015, the People's Bank of China announced it would continue to carefully push for full convertibility of the renminbi, after the currency was accepted as part of the IMF's special drawing rights basket. However, since late 2015 the Chinese Government has strengthened capital controls and oversight of overseas investments to better manage the exchange rate and maintain financial stability.

The Chinese Government faces numerous economic challenges including: (a) reducing its high domestic savings rate and correspondingly low domestic household consumption; (b) managing its high corporate debt burden to maintain financial stability; (c) controlling off-balance sheet local government debt used to finance infrastructure stimulus; (d) facilitating higher-wage job opportunities for the aspiring middle class, including rural migrants and college graduates, while maintaining competitiveness; (e) dampening speculative investment in the real estate sector without sharply slowing the economy; (f) reducing industrial overcapacity; and (g) raising productivity growth rates through the more efficient allocation of capital and state-support for innovation. Economic development has progressed further in coastal provinces than in the interior, and by 2016 more than 169.3 million migrant workers and their dependents had relocated to urban areas to find work. One consequence of China's population control policy known as the "one-child policy" - which was relaxed in 2016 to permit all families to have two children - is that China is now one of the most rapidly aging countries in the world. Deterioration in the environment - notably air pollution, soil erosion, and the steady fall of the water table, especially in the North - is another long-term problem. China continues to lose arable land because of erosion and urbanization. The Chinese Government is seeking to add energy production capacity from sources other than coal and oil, focusing on natural gas, nuclear, and clean energy development. In 2016, China ratified the Paris Agreement, a multilateral agreement to combat climate change, and committed to peak its carbon dioxide emissions between 2025 and 2030.

The government's 13th Five-Year Plan, unveiled in March 2016, emphasizes the need to increase innovation and boost domestic consumption to make the economy less dependent on government investment, exports, and heavy industry. However, China has made more progress on subsidizing innovation than rebalancing the economy. Beijing has committed to giving the market a more decisive role in allocating resources, but the Chinese Government's policies continue to favor state-owned enterprises and emphasize stability. Chinese leaders in 2010 pledged to double China's GDP by 2020, and the 13th Five Year Plan includes annual economic growth targets of at least 6.5% through 2020 to achieve that goal. In recent years, China has renewed its support

for state-owned enterprises in sectors considered important to "economic security," explicitly looking to foster globally competitive industries. Chinese leaders also have undermined some market-oriented reforms by reaffirming the "dominant" role of the state in the economy, a stance that threatens to discourage private initiative and make the economy less efficient over time. The slight acceleration in economic growth in 2017—the first such uptick since 2010—gives Beijing more latitude to pursue its economic reforms, focusing on financial sector deleveraging and its Supply-Side Structural Reform agenda, first announced in late 2015.

RECENT DEVELOPMENT

No recent development was found during our checks at present.

SHAREHOLDER CHART & BACKGROUND

| <i>Name</i> | <i>% of Shareholding</i> |
|-------------|--------------------------|
| Du Xiaolan | 90 |
| Hu Kexiong | 10 |

MANAGEMENT

Du Xiaolan, Legal Representative and Chairman

- Gender: F
- Nationality: China
- Qualification: University
- Working experience (s):

At present, working in SC as legal representative and chairman

Du Ke, General Manager

- Gender: M
- Nationality: China
- Qualification: University
- Working experience (s):

At present, working in SC as general manager

Dai Xiulan, Supervisor

- Gender: F
- Nationality: China
- Qualification: University
- Working experience (s):

At present, as supervisor of SC

BUSINESS OPERATION

SC's registered business scope includes research and development of pharmaceutical raw materials; research and development, production and wholesale and retail of chemical products and chemical raw materials; importing and exporting various kinds of commodities and technology, excluding the goods forbidden by the government.

SC is mainly engaged in manufacturing and selling pharmaceutical intermediates, electronic chemicals, fine chemicals, etc.

Brand: Vanz

SC's products mainly include:

9-(4-phenylphenyl)carbazole
4-dimethylamino-4-nitrostilbene
2-Bromo-5-Fluorobenzoic Acid

SC sources its materials 100% from domestic market, mainly Guangdong. SC sells 65% of its products in domestic market, and 35% to overseas market, mainly USA, Europe, Mid East, Southeast Asia, etc.

The buying terms of SC include Check, T/T and Credit of 30-60 days. The payment terms of SC include T/T, L/C and Credit of 30-60 days.

Major Customer

=====
Colorante Natural Oro SA De Cv

Staff & Office:

SC is known to have approx. 15 staff at present.

SC rents an area as its operating office and factory, but the detailed information is unknown.

RELATED COMPANY

SC is not known to have any subsidiary at present.

PAYMENT

Overall payment appraisal:

() Excellent () Good (X) Average () Fair () Poor () Not yet be determined

The appraisal serves as a reference to reveal SC's payments habits and ability to pay. It is based on the 3 weighed factors: Trade payment experience (through current enquiry with SC's suppliers), our delinquent payment records and our debt collection record concerning SC.

Trade payment experience: SC did not provide any name of trade/service suppliers and we have no other sources to conduct the enquiry at present.

Delinquent payment record: None in our database.

Debt collection record: No overdue amount owed by SC was placed to us for collection within the last 6 years.

BANKING

Basic Bank:

Bank of China Jiayu Sub-branch

AC#: 559968682515

FINANCIALS

The financials of SC is not available in local SAIC, and SC also refused to release the details.

CONCLUSIONS

SC is considered small-sized in its line with a development history of 7 years.

RATING EXPLANATIONS

| Credit Rating | Explanation | Rating Comments |
|---------------|------------------|--|
| A++ | Minimum Risk | Business dealings permissible with minimum risk of default |
| A+ | Low Risk | Business dealings permissible with low risk of default |
| A | Acceptable Risk | Business dealings permissible with moderate risk of default |
| B | Medium Risk | Business dealings permissible on a regular monitoring basis |
| C | Medium High Risk | Business dealings permissible preferably on secured basis |
| D | High Risk | Business dealing not recommended or on secured terms only |
| NB | New Business | No recommendation can be done due to business in infancy stage |
| NT | No Trace | No recommendation can be done as the business is not traceable |

NB is stated where there is insufficient information to facilitate rating. However, it is not to be considered as unfavourable.

This score serves as a reference to assess SC's credit risk and to set the amount of credit to be extended. It is calculated from a composite of weighted scores obtained from each of the major sections of this report. The assessed factors are as follows:

- Financial condition covering various ratios
- Company background and operations size
- Promoters / Management background
- Payment record
- Litigation against the subject
- Industry scenario / competitor analysis
- Supplier / Customer / Banker review (wherever available)
