BANGLADESH - ECONOMIC OVERVIEW

Bangladesh's economy has grown roughly 6% per year since 1996 despite prolonged periods of political instability, poor infrastructure, endemic corruption, insufficient power supplies, and slow implementation of economic reforms. Although more than half of GDP is generated through the services sector, almost half of Bangladeshis are employed in the agriculture sector, with rice as the single-most-important product. Garment exports, the backbone of Bangladesh's industrial sector, accounted for more than 80% of total exports and surpassed \$25 billion in 2016. The sector continues to grow, despite a series of high-profile factory accidents that have killed more than 1,000 workers and crippling strikes, including a nationwide transportation blockade orchestrated by the political opposition during the first several months of 2015. Steady export growth in the garment sector combined with remittances from overseas Bangladeshis - which totaled about \$15 billion and 8% of GDP in 2015 - are key contributors to Bangladesh's sustained economic growth and rising foreign exchange reserves.
