UNITED ARAB EMIRATES - ECONOMIC OVERVIEW

The UAE has an open economy with a high per capita income and a sizable annual trade surplus. Successful efforts at economic diversification have reduced the portion of GDP from the oil and gas sector to 30%.

Since the discovery of oil in the UAE nearly 60 years ago, the country has undergone a profound transformation from an impoverished region of small desert principalities to a modern state with a high standard of living. The government has increased spending on job creation and infrastructure expansion and is opening up utilities to greater private sector involvement. The country's free trade zones - offering 100% foreign ownership and zero taxes - are helping to attract foreign investors.

The global financial crisis of 2008-09, tight international credit, and deflated asset prices constricted the economy in 2009. UAE authorities tried to blunt the crisis by increasing spending and boosting liquidity in the banking sector. The crisis hit Dubai hardest, as it was heavily exposed to depressed real estate prices. Dubai lacked sufficient cash to meet its debt obligations, prompting global concern about its solvency and ultimately a \$20 billion bailout from the UAE Central Bank and Abu Dhabi Government that was refinanced in March 2014.

The UAE's dependence on oil is a significant long-term challenge, although the UAE is one of the most diversified countries in the Gulf Cooperation Council. Low oil prices have prompted the UAE to cut expenditures, including on some social programs, but the UAE has sufficient assets in its sovereign investment funds to cover its deficits. The government reduced fuel subsidies in August 2015, and has announced plans to introduce excise and value-added taxes by January 1, 2018. The UAE's strategic plan for the next few years focuses on economic diversification, promoting the UAE as a global trade and tourism hub, developing industry, and creating more job opportunities for nationals through improved education and increased private sector employment.

RATING EXPLANATIONS

Credit Rating	Explanation	Rating Comments
A++	Minimum Risk	Business dealings permissible with minimum risk of default
A+	Low Risk	Business dealings permissible with low risk of default
A	Acceptable Risk	Business dealings permissible with moderate risk of default
B	Medium Risk	Business dealings permissible on a regular monitoring basis
C	Medium High Risk	Business dealings permissible preferably on secured basis
D	High Risk	Business dealing not recommended or on secured terms only
NB	New Business	No recommendation can be done due to business in infancy stage
NT	No Trace	No recommendation can be done as the business is not traceable

NB is stated where there is insufficient information to facilitate rating. However, it is not to be considered as unfavourable.

This score serves as a reference to assess SC's credit risk and to set the amount of credit to be extended. It is calculated from a composite of weighted scores obtained from each of the major sections of this report. The assessed factors are as follows:

- Financial condition covering various ratios
- Company background and operations size
- Promoters / Management background
- Payment record
- Litigation against the subject
- Industry scenario / competitor analysis
- Supplier / Customer / Banker review (wherever available)
