**SINGAPORE - ECONOMIC OVERVIEW**

Singapore has a highly developed and successful free-market economy. It enjoys a remarkably open and corruption-free environment, stable prices, and a per capita GDP higher than that of most developed countries. Unemployment is very low. The economy depends heavily on exports, particularly of electronics, petroleum products, chemicals, medical and optical devices, pharmaceuticals, and on Singapore's vibrant transportation, business, and financial services sectors.

The economy contracted 0.6% in 2009 as a result of the global financial crisis, but has continued to grow since 2010. Growth from 2012-2017 was slower than during the previous decade, a result of slowing structural growth - as Singapore reached high-income levels - and soft global demand for exports. Growth recovered to 3.6% in 2017 with a strengthening global economy.

The government is attempting to restructure Singapore's economy to reduce its dependence on foreign labor, raise productivity growth, and increase wages amid slowing labor force growth and an aging population. Singapore has attracted major investments in advanced manufacturing, pharmaceuticals, and medical technology production and will continue efforts to strengthen its position as Southeast Asia's leading financial and technology hub. Singapore is a signatory of the Comprehensive and Progressive Agreement for Trans-Pacific Partnership (CPTPP), and a party to the Regional Comprehensive Economic Partnership (RCEP) negotiations with nine other ASEAN members plus Australia, China, India, Japan, South Korea, and New Zealand. In 2015, Singapore formed, with the other ASEAN members, the ASEAN Economic Community.

## **INDUSTRY ANALYSIS**

### **INDUSTRY : TRADING**

The wholesale & retail trade sector expanded by 6.8% in the third quarter of 2015, higher than the 6.0% growth in the preceding quarter. Growth was supported by both the wholesale trade and retail trade segments. The wholesale trade segment was boosted by an increase in both domestic and foreign wholesale trade sales volume. In particular, the domestic wholesale trade index rose by 7.4%, following the 8.1 % increase in the previous quarter. The strong performance in domestic wholesale trade was due to a surge in the sales of petroleum and petroleum products (14%), chemicals & chemical products (39%) and telecommunications & computers (18%).

Similarly, the foreign wholesale trade index rose by 10% in the third quarter of 2015, accelerating from the 6.9% rise in the previous quarter. Growth was driven by improvements in the sales of petroleum & petroleum products (21%), metals, timber & construction materials (10%) and general wholesale trade (8.8%).

Overall retail trade sales volume also recorded resilient growth of 5.6% in the third quarter of 2015, extending the 6.4 % expansion in the second quarter. Growth was supported by a surge in the volume of motor vehicle sales (44%), which was in turn due to a substantial increase in the supply of Certificate of Entitlements. Excluding motor vehicles, retail sales volume increased at a much slower pace of 0.7% over the same period.

The increase in retail sales volume (excluding motor vehicles) was due to improved non-discretionary goods sales. For instance, the sales of medical goods & toiletries and department store goods rose by 8.1% and 3.6% respectively.

According to the Retail News Asia, Food and beverage has overtaken fashion as the primary driver of demand for retail real estate in Singapore. Despite declining retail sales and consumer spending, the prime retail sector remained in good shape during the third quarter 2015.
