SINGAPORE - ECONOMIC OVERVIEW

Singapore has a highly developed and successful free-market economy. It enjoys a remarkably open and corruption-free environment, stable prices, and a per capita GDP higher than that of most developed countries. Unemployment is very low. The economy depends heavily on exports, particularly of consumer electronics, information technology products, medical and optical devices, pharmaceuticals, and on its vibrant transportation, business, and financial services sectors.

The economy contracted 0.6% in 2009 as a result of the global financial crisis, but has continued to grow since 2010. Growth in 2014-17 was slower than during the previous decade, at under 3% annually, largely a result of soft demand for exports amid a sluggish global economy and weak growth in Singapore's manufacturing sector.

The government is attempting to restructure Singapore's economy by weaning its dependence on foreign labor, addressing weak productivity growth, and increasing Singaporean wages. Singapore has attracted major investments in advanced manufacturing, pharmaceuticals, and medical technology production and will continue efforts to strengthen its position as Southeast Asia's leading financial and technology hub. Singapore is a member of the Regional Comprehensive Economic Partnership negotiations with the nine other ASEAN members plus Australia, China, India, Japan, South Korea, and New Zealand. In 2015, Singapore formed, with the other ASEAN members, the ASEAN Economic Community.

FINANCIAL ANALYSIS

Profitability

Turnover	:	Decreased	[2012 - 2016]
Profit/(Loss) Before Tax	:	Increased	[2012 - 2016]
Return on Shareholder Funds	:	Favourable	[258.77%]
Return on Net Assets	:	Favourable	[275.32%]

The continuous fall in turnover could be due to the lower demand for the Subject's products / services. The Subject's management have been efficient in controlling its operating costs. Generally the Subject was profitable. The favourable return on shareholders' funds and return on net assets indicate that the Subject's management was efficient in utilising the assets to generate returns.

Working Capital Control

Debtor Ratio	:	Favourable	[44 Days]
Creditors Ratio	:	Favourable	[2 Days]

The favourable debtors' days could be due to the good credit control measures implemented by the Subject. The Subject had a favourable creditors' ratio where the Subject could be taking advantage of the cash discounts and also wanting to maintain goodwill with its creditors.

Liquidity

Liquid Ratio	:	Acceptable	[0.97 Times]
Current Ratio	:	Unfavourable	[0.97 Times]

The Subject's liquid ratio was slightly low. This could indicate that the Subject's working capital was slightly deficient. The Subject will have to improve its liquidity position either by obtaining short term financing or increase its paid up capital so that it can meet all its short term obligations as and when they fall due.

Solvency

Interest Cover	:	Favourable	[100.78 Times]
Gearing Ratio	:	Favourable	[0.00 Times]

The interest cover showed that the Subject was able to service the interest. The favourable interest cover could indicate that the Subject was making enough profit to pay for the interest accrued. The Subject had no gearing and hence it had virtually no financial risk. The Subject was financed by its shareholders' funds and internally

generated fund. During the economic downturn, the Subject, having a zero gearing, will be able to compete better than those which are highly geared in the same industry.

Overall Assessment :

Due to the efficient control of its operating costs, the Subject was able to remain profitable despite lower turnover achieved during the year. The Subject's liquidity was at an acceptable range. If the Subject is able to obtain further short term financing, it should be able to meet all its short term obligations. With the favourable interest cover, the Subject could be able to service all the accrued interest without facing any difficulties. The Subject was a zero gearing company, it was solely dependant on its shareholders to provide funds to finance its business. The Subject has good chance of getting loans, if the needs arises.

Overall financial condition of the Subject : STABLE

rise in the previous quarter. Growth was driven by improvements in the sales of petroleum & petroleum products (21%), metals, timber & construction materials (10%) and general wholesale trade (8.8%). Overall retail trade sales volume also recorded resilient growth of 5.6% in the third quarter of 2015, extending the 6.4 % expansion in the second quarter. Growth was supported by a surge in the volume of motor vehicle sales (44%), which was in turn due to a substantial increase in the supply of Certificate of Entitlements. Excluding motor vehicles, retail sales volume increased at a much slower pace of 0.7% over the same period. The increase in retail sales volume (excluding motor vehicles) was due to improved non-discretionary goods sales. For instance, the sales of medical goods & toiletries and department store goods rose by 8.1% and 3.6% respectively. According to the Retail News Asia, Food and beverage has overtaken fashion as the primary driver of demand for retail real estate in Singapore. Despite declining retail sales and consumer spending, the prime retail sector remained in good shape during the third quarter 2015.
