SINGAPORE - ECONOMIC OVERVIEW

Singapore has a highly developed and successful free-market economy. It enjoys a remarkably open and corruption-free environment, stable prices, and a per capita GDP higher than that of most developed countries. Unemployment is very low. The economy depends heavily on exports, particularly of electronics, petroleum products, chemicals, medical and optical devices, pharmaceuticals, and on Singapore's vibrant transportation, business, and financial services sectors.

The economy contracted 0.6% in 2009 as a result of the global financial crisis, but has continued to grow since 2010. Growth from 2012-2017 was slower than during the previous decade, a result of slowing structural growth - as Singapore reached high-income levels - and soft global demand for exports. Growth recovered to 3.6% in 2017 with a strengthening global economy.

The government is attempting to restructure Singapore's economy to reduce its dependence on foreign labor, raise productivity growth, and increase wages amid slowing labor force growth and an aging population. Singapore has attracted major investments in advanced manufacturing, pharmaceuticals, and medical technology production and will continue efforts to strengthen its position as Southeast Asia's leading financial and technology hub. Singapore is a signatory of the Comprehensive and Progressive Agreement for Trans-Pacific Partnership (CPTPP), and a party to the Regional Comprehensive Economic Partnership (RCEP) negotiations with nine other ASEAN members plus Australia, China, India, Japan, South Korea, and New Zealand. In 2015, Singapore formed, with the other ASEAN members, the ASEAN Economic Community.

FINANCIAL ANALYSIS

Profitability

Turnover	:	Decreased	[2013 - 2017]
Profit/(Loss) Before Tax	:	Decreased	[2013 - 2017]
Return on Shareholder Funds	:	Unfavourable	[(1.85%)]
Return on Net Assets	:	Unfavourable	[(1.27%)]

The continuous fall in turnover could be due to the lower demand for the Subject's products / services. The Subject could be more efficient in controlling its operating costs and had managed to reduce its losses during the year. The Subject's unfavourable returns on shareholders' funds indicate the management's inefficiency in utilising its assets to generate returns.

Working Capital Control

Stock Ratio	:	Favourable	[1 Days]
Debtor Ratio	:	Favourable	[31 Days]
Creditors Ratio	:	Favourable	[0 Days]

The Subject's stocks were moving fast thus reducing its holding cost. This had reduced funds being tied up in stocks. The favourable debtors' days could be due to the good credit control measures implemented by the Subject. The Subject had a favourable creditors' ratio where the Subject could be taking advantage of the cash discounts and also wanting to maintain goodwill with its creditors.

Liquidity

Liquid Ratio	:	Favourable	[1.59 Times]
Current Ratio	:	Unfavourable	[1.60 Times]

A minimum liquid ratio of 1 should be maintained by the Subject in order to assure its creditors of its ability to meet short term obligations and the Subject was in a good liquidity position. Thus, we believe the Subject is able to meet all its short term obligations as and when they fall due.

Solvency

Interest Cover	:	Unfavourable	[(2.93 Times)]
Gearing Ratio	:	Favourable	[0.00 Times]

The Subject incurred losses in the year. It did not generate sufficient income to service its interest. If the situation does not improve, the Subject may be vulnerable to default in servicing the interest. The Subject had no gearing and hence it had virtually no financial risk. The Subject was financed by its shareholders' funds and internally generated fund. During the economic downturn, the Subject, having a zero gearing, will be able to compete better than those which are highly geared in the same industry.

Overall Assessment :

Although the Subject's turnover decreased, its losses also decreased during the year. This could be the result of more efficient control in its operating costs. The Subject was in good liquidity position with its total current

liabilities well covered by its total current assets. With its current net assets, the Subject should be able to repay its short term obligations. The Subject's interest cover was negative, indicating that it did not generate sufficient income to service its interest. If its result does not show impressive improvements or succeed obtaining short term financing or capital injection, it may not be able to service its interest and repay the loans. The Subject was a zero gearing company, it was solely dependant on its shareholders to provide funds to finance its business. The Subject has good chance of getting loans, if the needs arises.
Overall financial condition of the Subject : LIMITED

INDUSTRY ANALYSIS

INDUSTRY TRADING

:

According to the Ministry of Trade and Industry, the wholesale & retail trade sector expanded to 3.0% in the fourth quarter of 2017, moderating from the 3.3% growth in the previous quarter. The wholesale trade segment was boosted by an improvement in foreign wholesale sales volume, which more than offset the weakness in domestic wholesale sales volume. For the whole of 2017, the sector expanded by 2.3%, faster than the 1.0% growth in 2016. The improvement in growth can be attributed to the wholesale segment.

The domestic wholesale sales volume fell by 1.1% in the fourth quarter 2017, reversing the 2.0% growth in the preceding quarter. The poorer outturn was led by declines in the sales volume of household equipment & furniture (-27%) and general wholesale merchandise (-19%), which outweighed the increase in the sales volume of telecommunications & computers (20%). For the whole of 2017, the domestic wholesale trade index expanded by 1.0%, a turnaround from the 2.7% decline in 2016.

On the other hand, foreign wholesale sales volume rose to 6.2% in the fourth quarter 2017, a step-up from the 5.1% growth in the preceding quarter. Growth was driven by expansions in the sales of petroleum & petroleum-

related products (11%), telecommunications & computers (19%) and electronic components (16%). However, growth was partly offset by a 20% decline in the sales volume of metals, timber & construction materials. For the full year 2017, the foreign wholesale trade index rose by 3.6%, faster than the increase of 1.5% in the previous year.

Besides, retail sales volume rose by 2.1% in the fourth quarter 2017, improving from the 0.9% growth recorded in the third quarter. Growth was supported by improvements in both motor vehicle and non-motor vehicle sales volumes. While motor vehicle sales benefitted from an on-year increase in COE supply, growth in non-motor vehicle sales came on the back of an improvement in consumer sentiments. Notably, the sales volume of discretionary goods such as recreational goods, computer & telecommunication equipment and wearing apparel & footwear grew by 4.6%, 4.3 % and 3.1% respectively.

For the full year 2017, retail sales volume expanded by 1.3%, similar to the 1.5% growth recorded in 2016. Growth was driven by both motor vehicle sales and non-motor vehicle sales, which the former rising by 1.5% and the latter increasing by 1.3%. The rise in non-motor vehicle sales was underpinned by higher sales of discretionary goods. For instance, the sales volume of recreational goods (3.9%), watches & jewellery (2.4%), computer & telecommunications equipment (1.7%) and wearing apparel & footwear (1.5%) improved in 2017.

OVERALL INDUSTRY OUTLOOK : MARGINAL GROWTH

CREDIT RISK EVALUATION & RECOMMENDATION

Incorporated in 2006, the Subject is a Private Limited company, focusing on trading of industrial equipment and precision machines, machining, machine tools. Having been in the industry for over a decade, the Subject has achieved a certain market share and has built up a satisfactory reputation in the market. It should have received supports from its regular customers. A paid up capital of EUR 6,000,000 allows the Subject to expand its business more comfortably. With a strong backing from its holding company, the Subject enjoys timely financial assistance should the needs arise.

Over the years, the Subject has penetrated into both the local and overseas market. The Subject has positioned itself in the global market and is competing in the industry. Its stable clientele base will enable the Subject to further enhance its business in the near term. Overall, we regard that the Subject's management capability is average. This indicates that the Subject has greater potential to improve its business performance and raising income for the Subject.

Due to the challenging market conditions, the Subject's business performance seems to be deteriorating and losses incurred. The Subject has generated an unfavourable return on shareholders' funds indicating that the management was inefficient in utilising its funds to generate return. The Subject is in good liquidity position with its current liabilities well covered by its current assets. Hence, it has sufficient working capital to meet its short term financial obligations. Being a zero geared company, the Subject virtually has no financial risk as it is mainly dependent on its internal funds to finance its business. Given a positive net worth standing at EUR 23,574,539, the Subject should be able to maintain its business in the near terms.

The Subject's payment habit is average. With its adequate working capital, the Subject should be able to pay its short term debts.

The industry has reached its maturity stage and only enjoying a marginal growth. The steady growth of the country's economy will further enhance the industry activities. Thus, the Subject's future performance is very much depend on its marketing strategies in order to retain its position in the market.
