MALAYSIA - ECONOMIC OVERVIEW

Malaysia, an upper middle-income country, has transformed itself since the 1970s from a producer of raw materials into a multi-sector economy. Under current Prime Minister NAJIB, Malaysia is attempting to achieve high-income status by 2020 and to move further up the value-added production chain by attracting investments in high technology, knowledge-based industries and services. NAJIB's Economic Transformation Program is a series of projects and policy measures intended to accelerate the country's economic growth. The government has also taken steps to liberalize some services sub-sectors. Malaysia is vulnerable to a fall in world commodity prices or a general slowdown in global economic activity.

The NAJIB administration is continuing efforts to boost domestic demand and reduce the economy's dependence on exports. Domestic demand continues to anchor economic growth, supported mainly by private consumption, which accounts for 53% of GDP. Nevertheless, exports - particularly of electronics, oil and gas, and palm oil - remain a significant driver of the economy. In 2015, gross exports of goods and services were equivalent to 73% of GDP. The oil and gas sector supplied about 22% of government revenue in 2015, down significantly from prior years amid a decline in commodity prices and diversification of government revenues. Malaysia has embarked on a fiscal reform program aimed at achieving a balanced budget by 2020, including rationalization of subsidies and the 2015 introduction of a 6% value added tax. Sustained low commodity prices throughout the period not only strained government finances, but also shrunk Malaysia's current account surplus and weighed heavily on the Malaysian ringgit, which was among the region's worst performing currencies during 2013-17. The ringgit hit new lows following the US presidential election amid a broader selloff of emerging market assets.

Bank Negara Malaysia (the central bank) maintains adequate foreign exchange reserves; a well-developed regulatory regime has limited Malaysia's exposure to riskier financial instruments, although it remains vulnerable to volatile global capital flows. In order to increase Malaysia's competitiveness, Prime Minister NAJIB raised possible revisions to the special economic and social preferences accorded to ethnic Malays under the New Economic Policy of 1970, but retreated in 2013 after he encountered significant opposition from Malay nationalists and other vested interests. In September 2013 NAJIB launched the new Bumiputra Economic Empowerment Program, policies that favor and advance the economic condition of ethnic Malays.

Malaysia signed the 12-nation Trans-Pacific Partnership (TPP) free trade agreement in February 2016, although the future of the TPP remains unclear following the US withdrawal from the agreement. Along with nine other ASEAN members, Malaysia established the ASEAN Economic Community in 2015, which aims to advance regional economic integration.

FINANCIAL ANALYSIS

Profitability

Turnover	:	Increased	[2013 - 2017]
Profit/(Loss) Before Tax	:	Increased	[2013 - 2017]
Return on Shareholder Funds	:	Unfavourable	[(184.31%)]
Return on Net Assets	:	Unfavourable	[(98.40%)]

The Subject's turnover increased steadily as the demand for its products / services increased due to the goodwill built up over the years. Higher losses before tax during the year could be due to the higher operating costs incurred. The Subject's unfavourable returns on shareholders' funds indicate the management's inefficiency in utilising its assets to generate returns.

Working Capital Control

Stock Ratio	:	Unfavourable	[65 Days]
Debtor Ratio	:	Unfavourable	[74 Days]
Creditors Ratio	:	Favourable	[21 Days]

The Subject could be incurring higher holding cost. As its capital was tied up in stocks, it could face liquidity problems. The high debtors' ratio could indicate that the Subject was weak in its credit control. However, the Subject could also giving longer credit periods to its customers in order to boost its sales or to capture / retain its market share. The Subject had a favourable creditors' ratio where the Subject could be taking advantage of the cash discounts and also wanting to maintain goodwill with its creditors.

Liquidity

Liquid Ratio	:	Unfavourable	[0.66 Times]
Current Ratio	:	Unfavourable	[0.90 Times]

A low liquid ratio means that the Subject may be facing working capital deficiency. If the Subject cannot obtain additional financing or injection of fresh capital, it may face difficulties in meeting its short term obligations.

Solvency

Interest Cover	:	Unfavourable	[(1.15 Times)]
----------------	---	--------------	---	--------------	---

Gearing Ratio : Favourable [0.77 Times]

The Subject incurred losses in the year. It did not generate sufficient income to service its interest. If the situation does not improve, the Subject may be vulnerable to default in servicing the interest. The Subject was lowly geared thus it had a low financial risk. The Subject was mainly financed by its shareholders' funds and internally generated funds. In times of economic slowdown / downturn, the Subject being a lowly geared company, will be able to compete better than those companies which are highly geared in the same industry.

Overall Assessment :

Although the Subject's turnover increased its profits however showed a reverse trend. The losses could be due to the management's failure to maintain its competitiveness in the market. Due to its weak liquidity position, the Subject will be faced with problems in meeting all its short term obligations if no short term loan is obtained or additional capital injected into the Subject. The Subject's interest cover was negative, indicating that it did not generate sufficient income to service its interest. If its result does not show impressive improvements or succeed obtaining short term financing or capital injection, it may not be able to service its interest and repay the loans. The Subject as a lowly geared company, will be more secured compared to those highly geared companies. It has the ability to meet all its long term obligations.

Overall financial condition of the Subject : LIMITED

* Estimate / Preliminary

** Forecast

Based On Manufacturing Production Index

INDUSTRY ANALYSIS

MSIC

CODE

24102 : Production of bars and rods of stainless steel or other alloy steel

INDUSTRY MANUFACTURING

:

The manufacturing sector is forecast to increase 5.3% in year 2018 (2017: 5.5%). Output of export-oriented industries is projected to expand on account of sustained demand for E&E, refined petroleum and woods products. Growth in the domestic-oriented industries is anticipated to remain resilient supported by ongoing construction of infrastructure projects as well as strong demand for consumer products, especially food and transport equipment.

Value added of the manufacturing sector expanded further by 5.8% during the first half of 2017 (January – June 2016: 4.4%) with expansion across a wide range of outputs in both the export- and domestic-oriented industries. During the first eight months, production increased 6.4%, while sales rebounded significantly by 15.6% to RM500.2 billion (January – August 2016: 4%; -0.7%; RM432.8 billion). Output of export-oriented industries rose 6.5% (January – August 2016: 4.3%) led by an upturn in global electronics cycle and further enhanced by strong demand for resource-based products. Meanwhile, domestic-oriented industries expanded 6.2% (January – August 2016: 3.4%) benefiting from vibrant consumption and construction activities.

Within the export-oriented industries, E&E output expanded 9.3% while sales surged 16.3% to RM169.5 billion (January – August 2016: 6.8%; 9%; RM145.8 billion). Growth emanated mainly from the expansion in output of printed circuit boards, semiconductor devices and electronic integrated circuits which strengthened further by

DISCLAIMER : This Report is **PRIVATE & CONFIDENTIAL** and it is prepared at the request of and for its use by the Subscriber only. 24.4%, 11.9% and 16.9% (January – August 2016: 11.9%; 5.9%; 15%), respectively. This is in line with the trend in global semiconductor sales which is expected to expand 11.5% in 2017, the highest level since 2010. On the contrary, the output of computers and peripheral equipment contracted 7.7% (January – August 2016: 3.1%) as a result of lower demand for notebooks and personal computers following rising preferences for smartphones and tablets. Meanwhile, consumer electronics grew at a moderate pace of 2.6% (January – August 2016: 5.3%) partly due to lower demand for in-car entertainment, portable media players and digital cameras.

Output of wood and wood products grew 7.3% (January – August 2016: 7.8%). The growth was primarily supported by output of sawmilling and planning of wood which expanded 14.7% (January – August 2016: 16.8%) in response to strong demand from Australia, Japan and the US. Meanwhile, production of wooden and cane furniture remained steady at 10.9% (January – August 2016: 10.9%), benefiting from greater adoption of technology and diversification of export markets.

Manufacture of food products rose 11.2%, largely attributed to a significant increase in refined palm oil at 26.1% (January – August 2016: 6.3%; -3.3%), following higher production of CPO. Meanwhile, output of other food products grew 7% supported by production of bread, cakes and other bakery (15.6%) as well as biscuits and cookies (12%) to meet the rising demand from households (January – August 2016: 11.1%; 19.2%; 19.1%). For the year, the manufacturing sector is projected to expand further by 5.5% (2016: 4.4%) mainly attributed to an upturn in global semiconductor sales as well as higher demand for consumer products and construction materials.

OVERALL INDUSTRY OUTLOOK : Marginal Growth

CREDIT RISK EVALUATION & RECOMMENDATION

Incorporated in 2008, the Subject is a Private Limited company, focusing on manufacturing of stainless steel and other metal products. Having been in the industry for over a decade, the Subject has achieved a certain market share and has built up a satisfactory reputation in the market. It should have received supports from its regular customers. Presently, the issued and paid up capital of the Subject stands at MYR 1,151,600,000. The Subject has a strong support from its holding company.

Investigation revealed, the Subject has penetrated into both the local and overseas market. The Subject has positioned itself in the global market and is competing in the industry. Its stable clientele base will enable the Subject to further enhance its business in the near term. The Subject has a total workforce of 100 employees in its business operations. Overall, we regard that the Subject's management capability is average. This indicates that the Subject has greater potential to improve its business performance and raising income for the Subject.

Despite the higher turnover, the Subject suffered pre-tax losses which reflected a highly competitive business environment. The Subject has generated an unfavourable return on shareholders' funds indicating that the management was inefficient in utilising its funds to generate return. Due to its weak liquidity position, the Subject may face working capital deficiency in meeting its short term financial obligations if no fresh capital are injected into the Subject. Being a lowly geared company, the Subject is exposed to low financial risk as it is mainly dependent on its internal funds to finance its business needs. Given a positive net worth standing at MYR 161,249,000, the Subject should be able to maintain its business in the near terms.

The Subject's supplier are from both the local and overseas countries. This will eliminates the risk of dependency on deliveries from a number of key suppliers and insufficient quantities of its raw materials. Overall the Subject has a good control over its resources.

The Subject's payment habit is average. With its adequate working capital, the Subject should be able to pay its

DISCLAIMER : This Report is **PRIVATE & CONFIDENTIAL** and it is prepared at the request of and for its use by the Subscriber only. short term debts.

The industry has reached its maturity stage and only enjoying a marginal growth. The steady growth of the country's economy will further enhance the industry activities. Thus, the Subject's future performance is very much depend on its marketing strategies in order to retain its position in the market.

In view of the above, we only recommend credit be proceeded to the Subject with guarantee.

RATING EXPLANATIONS

Credit Rating	Explanation	Rating Comments
A++	Minimum Risk	Business dealings permissible with minimum risk of default
A+	Low Risk	Business dealings permissible with low risk of default
A	Acceptable Risk	Business dealings permissible with moderate risk of default
B	Medium Risk	Business dealings permissible on a regular monitoring basis
C	Medium High Risk	Business dealings permissible preferably on secured basis
D	High Risk	Business dealing not recommended or on secured terms only
NB	New Business	No recommendation can be done due to business in infancy stage
NT	No Trace	No recommendation can be done as the business is not traceable

NB is stated where there is insufficient information to facilitate rating. However, it is not to be considered as unfavourable.

This score serves as a reference to assess SC's credit risk and to set the amount of credit to be extended. It is calculated from a composite of weighted scores obtained from each of the major sections of this report. The assessed factors are as follows:

- Financial condition covering various ratios
- Company background and operations size
- Promoters / Management background
- Payment record
- Litigation against the subject
- Industry scenario / competitor analysis
- Supplier / Customer / Banker review (wherever available)
