

MIRA INFORM REPORT

Report No. :	538282
Report Date :	10.11.2018

IDENTIFICATION DETAILS

Name :	CASCADE CORPORATION
Registered Office :	C T Corporation System, 780 Commercial St Se Ste 100 ,Csz Salem Or 97301
Country :	United States
Financials (as on) :	2017 (summarized)
Date of Incorporation :	14.08.1943
Legal Form :	Corporation
Line of Business :	Subject is dedicated to the manufacture of materials handling load engagement devices for lift trucks.
No. of Employees :	660

RATING & COMMENTS

(Mira Inform has adopted New Rating mechanism w.e.f. 23rd January 2017)

MIRA's Rating :	A+
-----------------	----

Credit Rating	Explanation	Rating Comments
A+	Low Risk	Business dealings permissible with low risk of default

Status :	Excellent
Payment Behaviour :	Regular
Litigation :	Clear

UNITED STATES - ECONOMIC OVERVIEW

The US has the most technologically powerful economy in the world, with a per capita GDP of \$59,500. US firms are at or near the forefront in technological advances, especially in computers, pharmaceuticals, and medical, aerospace, and military equipment; however, their advantage has narrowed since the end of World War II. Based on a comparison of GDP measured at purchasing power parity conversion rates, the US economy in 2014, having stood as the largest in the world for more than a century, slipped into second place behind China, which has more than tripled the US growth rate for each year of the past four decades.

In the US, private individuals and business firms make most of the decisions, and the federal and state governments buy needed goods and services predominantly in the private marketplace. US business firms enjoy greater flexibility than their counterparts in Western Europe and Japan in decisions to expand capital plant, to lay off surplus workers, and to develop new products. At the same time, businesses face higher barriers to enter their rivals' home markets than foreign firms face entering US markets.

Long-term problems for the US include stagnation of wages for lower-income families, inadequate investment in deteriorating infrastructure, rapidly rising medical and pension costs of an aging population, energy shortages, and sizable current account and budget deficits.

The onrush of technology has been a driving factor in the gradual development of a "two-tier" labor market in which those at the bottom lack the education and the professional/technical skills of those at the top and, more and more, fail to get comparable pay raises, health insurance coverage, and other benefits. But the globalization of trade, and especially the rise of low-wage producers such as China, has put additional downward pressure on wages and upward pressure on the return to capital. Since 1975, practically all the gains in household income have gone to the top 20% of households. Since 1996, dividends and capital gains have grown faster than wages or any other category of after-tax income.

Imported oil accounts for more than 50% of US consumption and oil has a major impact on the overall health of the economy. Crude oil prices doubled between 2001 and 2006, the year home prices peaked; higher gasoline prices ate into consumers' budgets and many individuals fell behind in their mortgage payments. Oil prices climbed another 50% between 2006 and 2008, and bank foreclosures more than doubled in the same period. Besides dampening the housing market, soaring oil prices caused a drop in the value of the dollar and a deterioration in the US merchandise trade deficit, which peaked at \$840 billion in 2008. Because the US economy is energy-intensive, falling oil prices since 2013 have alleviated many of the problems the earlier increases had created.

The sub-prime mortgage crisis, falling home prices, investment bank failures, tight credit, and the global economic downturn pushed the US into a recession by mid-2008. GDP contracted until the third quarter of 2009, the deepest and longest downturn since the Great Depression. To help stabilize financial markets, the US Congress established a \$700 billion Troubled Asset Relief Program in October 2008. The government used some of these funds to purchase equity in US banks and industrial corporations, much of which had been returned to the government by early 2011. In January 2009, Congress passed and former President Barack OBAMA signed a bill providing an additional \$787 billion fiscal stimulus to be used over 10 years - two-thirds on additional spending and one-third on tax cuts - to create jobs and to help the economy recover. In 2010 and 2011, the federal budget deficit reached nearly 9% of GDP. In 2012, the Federal Government reduced the growth of spending and the deficit shrank to 7.6% of GDP. US revenues from taxes and other sources are lower, as a percentage of GDP, than those of most other countries.

Wars in Iraq and Afghanistan required major shifts in national resources from civilian to military purposes and contributed to the growth of the budget deficit and public debt. Through FY 2018, the direct costs of the wars will have totaled more than \$1.9 trillion, according to US Government figures.

In March 2010, former President OBAMA signed into law the Patient Protection and Affordable Care Act (ACA), a health insurance reform that was designed to extend coverage to an additional 32 million Americans by 2016,

through private health insurance for the general population and Medicaid for the impoverished. Total spending on healthcare - public plus private - rose from 9.0% of GDP in 1980 to 17.9% in 2010.

In July 2010, the former president signed the DODD-FRANK Wall Street Reform and Consumer Protection Act, a law designed to promote financial stability by protecting consumers from financial abuses, ending taxpayer bailouts of financial firms, dealing with troubled banks that are "too big to fail," and improving accountability and transparency in the financial system - in particular, by requiring certain financial derivatives to be traded in markets that are subject to government regulation and oversight.

The Federal Reserve Board (Fed) announced plans in December 2012 to purchase \$85 billion per month of mortgage-backed and Treasury securities in an effort to hold down long-term interest rates, and to keep short-term rates near zero until unemployment dropped below 6.5% or inflation rose above 2.5%. The Fed ended its purchases during the summer of 2014, after the unemployment rate dropped to 6.2%, inflation stood at 1.7%, and public debt fell below 74% of GDP. In December 2015, the Fed raised its target for the benchmark federal funds rate by 0.25%, the first increase since the recession began. With continued low growth, the Fed opted to raise rates several times since then, and in December 2017, the target rate stood at 1.5%.

In December 2017, Congress passed and President Donald TRUMP signed the Tax Cuts and Jobs Act, which, among its various provisions, reduces the corporate tax rate from 35% to 21%; lowers the individual tax rate for those with the highest incomes from 39.6% to 37%, and by lesser percentages for those at lower income levels; changes many deductions and credits used to calculate taxable income; and eliminates in 2019 the penalty imposed on taxpayers who do not obtain the minimum amount of health insurance required under the ACA. The new taxes took effect on 1 January 2018; the tax cut for corporations are permanent, but those for individuals are scheduled to expire after 2025. The Joint Committee on Taxation (JCT) under the Congressional Budget Office estimates that the new law will reduce tax revenues and increase the federal deficit by about \$1.45 trillion over the 2018-2027 period. This amount would decline if economic growth were to exceed the JCT's estimate.

The company does not make its banking data public.

HISTORY

History

The company was founded in 1943 as Cascade Manufacturing Company.

Key Developments

Cascade Manufacturing Company was founded in 1943 with a total capital investment of \$7500 in Portland, Oregon as a small machine shop employing just four people. The first recorded sales revenues involved the machining and assembly of stainless steel valves, pipe fittings and other components. Sales for the first year of operation totaled \$60,000.

1948 At the end of five years of operation, annual sales volume had increased to \$330,000 and the company had grown to approximately 40 employees. Design and production of the company's first hydraulic cylinder led the way in Cascade's aggressive pursuit of new business opportunities.

During the 1950's, Cascade began to design, manufacture, and sell hydraulic attachments. In 1956, construction was completed on a new facility to house all plant and office operations in Portland, Oregon.

In 1959, Cascade broadened its base of operations with a second manufacturing plant in Springfield, Ohio. The following year marked Cascade's initial move into the global arena, with interests established in companies in The Netherlands, England and Australia.

In 1964, the company name was changed to Cascade Corporation. Cascade went public with an initial offering of 200,000 shares of common stock in 1965.

1967 Cascade opens a subsidiary operation in the Republic of South Africa and acquires C.M. Scott Fluid Power, Ltd., a Canadian manufacturer of hydraulic

cylinders located near Toronto, Ontario.

1968 Our 25th year in business was an exciting period. Approval was received from the Japanese government to form a wholly-owned Cascade subsidiary operation in Japan. Ramey Hydraulic Loaders, Inc of Roseburg, Oregon was acquired. Construction of a new Cramlington, UK manufacturing plant was completed.

1973-74 Ramey Hydraulic Loader operations were discontinued. Diamond, NV, a 20,000 square foot plant located in Hoorn, The Netherlands is acquired by Cascade to help meet growing European market demands.

1980 A new manufacturing plant opened in Warner Robins, Georgia to expand US production of sidershifters. Subsidiary operations now manufacture Cascade products worldwide.

1982 Severe economic recession in both the United States and Europe results in a 25% decline in consolidated net sales, employment levels were reduced from 1175 to 760.

1986 Cascade enters into a joint venture agreement with the Xiamen Forklift Company located in Xiamen, (Xiamen-Cascade Corporation, Ltd) for the production and sale of attachments in the Peoples Republic of China.

1988 A new 110, 000 square foot facility in Westminster, South Carolina dedicated to production of the new Cascade World Mast is completed. Sales reach nearly \$140.2 million, earnings hit a record level, and total employment rises to 1005.

Cascade expanded its product offering dramatically in 1996 and 1997 with the acquisition of five companies including Kenhar Corporation, the global leader in forks.

1999 marked the sale of the world mast product line and Industrial Tires Limited-two of the five companies acquired in 1996 and 1997. In 2002 the cylinder division was sold to Precision Hydraulics, a newly formed company headed by Chris Barclay. The sale included manufacturing facilities in Beulaville, North Carolina and Cramlington, Northumberland, United

Kingdom.

The year 2003 was notable as the company's 60th anniversary as well as a number of key acquisitions in the European market. Cascade acquired fork manufacturer FEMA of Germany; ITAB, a Swedish manufacturer of paper roll handling products; and Roncari, the leading supplier of attachments to the Italian lift truck market.

2004 marked the acquisition of yet another fork company, Falkenroth. In addition to forks, the Schalksmühle, Germany based Falkenroth group also manufactured lines of drop forgings and excavator teeth. The purchase provides Cascade OEM customers with assurances that the capacity will be available to meet their production requirements, even in the most rapidly-expanding markets.

2006 In August, the Warner Robbins plant produced its millionth Sideshifter. December marked the acquisition of PSM, a manufacturer of attachments for the construction industry-a new market for Cascade.

2007 Cascade Asia marked a number of significant anniversaries: a 40th anniversary for Cascade Japan, a 20th anniversary for Cascade Xiamen (China) and the opening of a new fork facility for Cascade Hebei who celebrated a 10th anniversary in 2007. The acquisition of American Compaction Equipment, Inc. becomes the next step into the Construction Attachment market. Shipments from the new Xiamen (China) and Hebei (China) fork factories begin. The year also marked the Introduction of Chinese produced forks into the European market and the expansion of the attachment production capacity in Xiamen.

2008 marked the launch of the Cascade "WorldFork™", a high volume commodity fork featuring standardized engineering specification. In response to the unprecedented economic environment Cascade made significant personnel reductions in all regions. All Cascade manufacturing operations moved to some form of flexible reduced work schedules. Total personnel costs reduced by 30% to 35% in North America and Europe compared to last year.

2009 Due to downturns in the economy, Cascade

closes fork plants in France and Germany and the attachment facility in Almere, The Netherlands. All European attachment manufacturing operations are consolidated in Verona, Italy.

2010 marks an accelerated recovery of the global lift truck industry. The Chinese market reaches historic highs in terms of lift truck shipments.

In 2011 a massive flood strikes the Queensland area of Australia, team members from around the globe participate in recovery efforts to ensure Cascade Australia customers are not impacted.

2013 – Cascade reinforces the Rental & Reman services by adding another facility in Almere, The Netherlands to serve the northern European countries in a timely manner. This new opening in the Netherlands, along with a new Rental and Reman site in Italy, will allow Cascade the ability to provide attachments for rental and used products in just 2 weeks throughout all Europe.

2014 – Cascade announces the expansion of their Cascade Remanufacturing Center (CRC) in Mississauga, Ontario, in a new building adjacent to the existing Canadian corporate offices and manufacturing facility.

2015 – Cascade wins “Product of the Year 2014” award from Plant Engineering Magazine for TFCTM - Touch Force Control, the innovative touch-screen clamp force control system. Robert Warren, Jr., Chairman and Chief Executive Officer, retires but continues on as Chairman of the Board. Andy Anderson was elected President and Chief Executive Officer of the company. The company is a subsidiary of TOYOTA INDUSTRIES CORPORATION

Parent Company

PRINCIPAL ACTIVITY

General Description

CASCADE CORPORATION is dedicated to the manufacture of materials handling load engagement devices for lift trucks.

Service/Product Description

The company manufactures loading devices and replacement parts primarily for the lift-truck and construction industry. Its products are designed to handle loads with or without pallets. The company also

RATING EXPLANATIONS

Credit Rating	Explanation	Rating Comments
A++	Minimum Risk	Business dealings permissible with minimum risk of default
A+	Low Risk	Business dealings permissible with low risk of default
A	Acceptable Risk	Business dealings permissible with moderate risk of default
B	Medium Risk	Business dealings permissible on a regular monitoring basis
C	Medium High Risk	Business dealings permissible preferably on secured basis
D	High Risk	Business dealing not recommended or on secured terms only
NB	New Business	No recommendation can be done due to business in infancy stage
NT	No Trace	No recommendation can be done as the business is not traceable

NB is stated where there is insufficient information to facilitate rating. However, it is not to be considered as unfavourable.

This score serves as a reference to assess SC's credit risk and to set the amount of credit to be extended. It is calculated from a composite of weighted scores obtained from each of the major sections of this report. The assessed factors are as follows:

- Financial condition covering various ratios
- Company background and operations size
- Promoters / Management background
- Payment record
- Litigation against the subject
- Industry scenario / competitor analysis
- Supplier / Customer / Banker review (wherever available)
