## SINGAPORE - ECONOMIC OVERVIEW

Singapore has a highly developed and successful free-market economy. It enjoys an open and corruption-free environment, stable prices, and a per capita GDP higher than that of most developed countries. Unemployment is very low. The economy depends heavily on exports, particularly of electronics, petroleum products, chemicals, medical and optical devices, pharmaceuticals, and on Singapore's vibrant transportation, business, and financial services sectors.

The economy contracted 0.6% in 2009 as a result of the global financial crisis, but has continued to grow since 2010. Growth from 2012-2017 was slower than during the previous decade, a result of slowing structural growth - as Singapore reached high-income levels - and soft global demand for exports. Growth recovered to 3.6% in 2017 with a strengthening global economy.

The government is attempting to restructure Singapore's economy to reduce its dependence on foreign labor, raise productivity growth, and increase wages amid slowing labor force growth and an aging population. Singapore has attracted major investments in advanced manufacturing, pharmaceuticals, and medical technology production and will continue efforts to strengthen its position as Southeast Asia's leading financial and technology hub. Singapore is a signatory of the Comprehensive and Progressive Agreement for Trans-Pacific Partnership (CPTPP), and a party to the Regional Comprehensive Economic Partnership (RCEP) negotiations with nine other ASEAN members plus Australia, China, India, Japan, South Korea, and New Zealand. In 2015, Singapore formed, with the other ASEAN members, the ASEAN Economic Community.

## **FINANCIAL ANALYSIS**

Profitability

Turnover	:	Increased	[	2013 - 2017	]
Profit/(Loss) Before Tax	:	Decreased	[	2013 - 2017	]
Return on Shareholder Funds	:	Acceptable	[	16.01%	]
Return on Net Assets	:	Acceptable	[	18.72%	]

The Subject's turnover increased steadily as the demand for its products / services increased due to the goodwill built up over the years. The dip in profit could be due to the stiff market competition which reduced the Subject's profit margin. The Subject's management had generated acceptable return for its shareholders using its assets.

Working Capital Control

Stock Ratio	:	Favourable	[	26 Days	]
Debtor Ratio	:	Acceptable	[	58 Days	]
Creditors Ratio	:	Favourable	[	24 Days	]

The Subject's stocks were moving fast thus reducing its holding cost. This had reduced funds being tied up in stocks. The Subject's management was quite efficient in handling its debtors. The Subject's debtors days were at an acceptable range, thus the risk of its debts turning bad was minimised. The Subject had a favourable creditors' ratio where the Subject could be taking advantage of the cash discounts and also wanting to maintain goodwill with its creditors.

Liquidity

Liquid Ratio	:	Favourable	[	4.09 Times	]
Current Ratio	:	Favourable	[	4.60 Times	]

A minimum liquid ratio of 1 should be maintained by the Subject in order to assure its creditors of its ability to meet short term obligations and the Subject was in a good liquidity position. Thus, we believe the Subject is able to meet all its short term obligations as and when they fall due.

Solvency

Interest Cover	:	Favourable	[	441.21 Times	]
Gearing Ratio	:	Favourable	[	0.00 Times	]

The interest cover showed that the Subject was able to service the interest. The favourable interest cover could indicate that the Subject was making enough profit to pay for the interest accrued. The Subject had no gearing and hence it had virtually no financial risk. The Subject was financed by its shareholders' funds and internally generated fund. During the economic downturn, the Subject, having a zero gearing, will be able to compete better than those which are highly geared in the same industry.

Overall Assessment :

Although the Subject's turnover had increased, its profits had declined over the same corresponding period. This could be due to the stiffer market competition and / or higher operating costs which lowered the Subject's profit margin. The Subject was in good liquidity position with its total current liabilities well covered by its total current assets. With its current net assets, the Subject should be able to repay its short term obligations. With the favourable interest cover, the Subject could be able to service all the accrued interest without facing any difficulties. The Subject was a zero gearing company, it was solely dependant on its shareholders to provide funds to finance its business. The Subject has good chance of getting loans, if the needs arises.

Overall financial condition of the Subject : **STRONG**

## **INDUSTRY ANALYSIS**

### **INDUSTRY MANUFACTURING**

:

The manufacturing sector expanded by 4.8% in the fourth quarter, supported largely by robust output growth in the electronics and precision engineering clusters. For the whole of 2017, the manufacturing sector grew by 10%, accelerating from the 3.7% expansion in 2016. Growth was largely driven by the electronics and precision engineering clusters, even as the biomedical manufacturing, transport engineering and general manufacturing industries clusters contracted.

The electronics cluster grew by 24% in the fourth quarter 2017, largely due to the semiconductors segment, which expanded by 35%. Specifically, the semiconductors segment benefitted from robust global semiconductors demand, which was in turn driven by key end markets such as the smartphone market. At the same time, the computer peripherals segment registered healthy growth of 9.5%, supported by buoyant demand for printer-related products. On the other hand, the data storage and other electronic modules & components segments contracted by 25% and 7.5% respectively. For the full year, the electronics cluster expanded by 34% as the healthy performance of the semiconductors and computer peripherals segments more than offset the weakness in the data storage segment.

In fourth quarter 2017, the precision engineering cluster expanded to 20%, supported by both the precision modules & components (PMC) and machinery & systems (M&S) segments. Output in the PMC segment rose by 40% due to an increase in the production of dies, moulds, tools, jigs & fixture, optical instruments and metal precision components. Meanwhile, the M&S segment grew by 8.9% in tandem with healthy export demand for semiconductor manufacturing equipment. For the whole of 2017, the output of the precision engineering cluster rose by 18% on account of robust expansions in both segments.

The chemicals cluster grew by 12% in the fourth quarter 2017, with all segments recording growth. In particular,

the petrochemicals segment grew by 23% on the back of production capacity expansions, while the petroleum segment expanded by 13% supported by higher refining margins. At the same time, the other chemicals and specialties segments posted growth of 8.1% and 6.2% respectively. For 2017 as a whole, the chemicals cluster expanded by 6.2%, supported by growth in all segments.

Besides, output of the general manufacturing industries cluster increased to 6.6% in the fourth quarter 2017, primarily due to the strong performance of the food, beverages & tobacco (FBT) segment, which grew by 18% on the back of a surge in the production of beverages products. On the other hand, the printing segment shrank by 11% due to weak demand for commercial printing, while output in the miscellaneous industries segment declined by 0.6% on account of a lower production of construction-related materials. For the whole of 2017, the general manufacturing industries cluster contracted by 1.6%, as output declines in the printing and miscellaneous industries segments outweighed output gains in the FBT segment.

Moreover, output of the transport engineering cluster fell by 7.8% in the fourth quarter 2017. The aerospace segment recorded robust growth of 13% due to a higher volume of repair and maintenance work from commercial airlines. However, this was more than offset by output declines in the marine & offshore engineering (M&OE) and land transport segments of 22% and 11% respectively. In particular, the M&OE segment remained weak on account of low levels of rig-building, shipbuilding and repair activities. For the full year 2017, the transport engineering cluster shrank by 6.9%, dragged down mainly by the M&OE segment.

The biomedical manufacturing cluster contracted by 28% in the fourth quarter 2017, weighed down by the pharmaceuticals segment (-37%) on the back of a drop in the production of active pharmaceutical ingredients and biological products. However, the medical technology segment, which grew at a healthy pace of 3.3%, provided some support to the cluster. For 2017 as a whole, output in the biomedical manufacturing cluster fell by 9.3%, led by the output decline in the pharmaceuticals segment.

OVERALL INDUSTRY OUTLOOK : MARGINAL GROWTH

## **CREDIT RISK EVALUATION & RECOMMENDATION**

Incorporated in 2001, the Subject is a Private Limited company, focusing on manufacture of polymers, custom engineered thermoplastic. With its long establishment in the market, the Subject has received strong support from its stable customers base. Its business position in the market is quite stable and it is expected to enjoy better market shares over its rivals. Presently, the issued and paid up capital of the Subject stands at only SGD 2. However, with a strong backing from its holding company, the Subject enjoys timely financial assistance should the needs arise.

Over the years, the Subject has established an extensive clientele base in the market. Besides catering to the local market, the Subject has penetrated into other countries. With the contribution of both local and overseas customers, the Subject is likely to be exposed to lower commercial risk. Hence, we believe that the Subject has better business expansion opportunities in the future. Being a moderate size company, the Subject has a total workforce of 85 employees in its business operations. Overall, we regard that the Subject's management capability is average. This indicates that the Subject has greater potential to improve its business performance and raising income for the Subject.

Financially, the Subject registered a higher turnover compared to previous year. However, its profits showed a reverse trend. The lower profit achieved was a result of higher operating cost and increased competition. Return on shareholders' funds of the Subject was at an acceptable range which indicated that the management was efficient in utilising its funds to generate income. The Subject is in good liquidity position with its current liabilities well covered by its current assets. Hence, it has sufficient working capital to meet its short term financial

obligations. Being a zero geared company, the Subject virtually has no financial risk as it is mainly dependent on its internal funds to finance its business. Given a positive net worth standing at USD 68,222,747, the Subject should be able to maintain its business in the near terms.

The Subject's supplier are from both the local and overseas countries. This will eliminates the risk of dependency on deliveries from a number of key suppliers and insufficient quantities of its raw materials. Overall the Subject has a good control over its resources.

Overall, the Subject's payment habit is good as the Subject has a good credit control and it could be taking advantage of the cash discounts while maintaining a good reputation with its creditors.

The industry has reached its maturity stage and only enjoying a marginal growth. The steady growth of the country's economy will further enhance the industry activities. Thus, the Subject's future performance is very much depend on its marketing strategies in order to retain its position in the market.
