SINGAPORE - ECONOMIC OVERVIEW

Singapore has a highly developed and successful free-market economy. It enjoys a remarkably open and corruption-free environment, stable prices, and a per capita GDP higher than that of most developed countries. Unemployment is very low. The economy depends heavily on exports, particularly of electronics, petroleum products, chemicals, medical and optical devices, pharmaceuticals, and on Singapore's vibrant transportation, business, and financial services sectors.

The economy contracted 0.6% in 2009 as a result of the global financial crisis, but has continued to grow since 2010. Growth from 2012-2017 was slower than during the previous decade, a result of slowing structural growth - as Singapore reached high-income levels - and soft global demand for exports. Growth recovered to 3.6% in 2017 with a strengthening global economy.

The government is attempting to restructure Singapore's economy to reduce its dependence on foreign labor, raise productivity growth, and increase wages amid slowing labor force growth and an aging population. Singapore has attracted major investments in advanced manufacturing, pharmaceuticals, and medical technology production and will continue efforts to strengthen its position as Southeast Asia's leading financial and technology hub. Singapore is a signatory of the Comprehensive and Progressive Agreement for Trans-Pacific Partnership (CPTPP), and a party to the Regional Comprehensive Economic Partnership (RCEP) negotiations with nine other ASEAN members plus Australia, China, India, Japan, South Korea, and New Zealand. In 2015, Singapore formed, with the other ASEAN members, the ASEAN Economic Community.

INDUSTRY ANALYSIS

INDUSTRY MANUFACTURING

:

The manufacturing sector expanded by 4.8% in the fourth quarter, supported largely by robust output growth in the electronics and precision engineering clusters. For the whole of 2017, the manufacturing sector grew by 10%, accelerating from the 3.7% expansion in 2016. Growth was largely driven by the electronics and precision engineering clusters, even as the biomedical manufacturing, transport engineering and general manufacturing industries clusters contracted.

The electronics cluster grew by 24% in the fourth quarter 2017, largely due to the semiconductors segment, which expanded by 35%. Specifically, the semiconductors segment benefitted from robust global semiconductors

demand, which was in turn driven by key end markets such as the smartphone market. At the same time, the computer peripherals segment registered healthy growth of 9.5%, supported by buoyant demand for printer-related products. On the other hand, the data storage and other electronic modules & components segments contracted by 25% and 7.5% respectively. For the full year, the electronics cluster expanded by 34% as the healthy performance of the semiconductors and computer peripherals segments more than offset the weakness in the data storage segment.

In fourth quarter 2017, the precision engineering cluster expanded to 20%, supported by both the precision modules & components (PMC) and machinery & systems (M&S) segments. Output in the PMC segment rose by 40% due to an increase in the production of dies, moulds, tools, jigs & fixture, optical instruments and metal precision components. Meanwhile, the M&S segment grew by 8.9% in tandem with healthy export demand for semiconductor manufacturing equipment. For the whole of 2017, the output of the precision engineering cluster rose by 18% on account of robust expansions in both segments.

The chemicals cluster grew by 12% in the fourth quarter 2017, with all segments recording growth. In particular, the petrochemicals segment grew by 23% on the back of production capacity expansions, while the petroleum segment expanded by 13% supported by higher refining margins. At the same time, the other chemicals and specialties segments posted growth of 8.1% and 6.2% respectively. For 2017 as a whole, the chemicals cluster expanded by 6.2%, supported by growth in all segments.

Besides, output of the general manufacturing industries cluster increased to 6.6% in the fourth quarter 2017, primarily due to the strong performance of the food, beverages & tobacco (FBT) segment, which grew by 18% on the back of a surge in the production of beverages products. On the other hand, the printing segment shrank by 11% due to weak demand for commercial printing, while output in the miscellaneous industries segment declined by 0.6% on account of a lower production of construction-related materials. For the whole of 2017, the general manufacturing industries cluster contracted by 1.6%, as output declines in the printing and miscellaneous industries segments outweighed output gains in the FBT segment.

Moreover, output of the transport engineering cluster fell by 7.8% in the fourth quarter 2017. The aerospace segment recorded robust growth of 13% due to a higher volume of repair and maintenance work from commercial airlines. However, this was more than offset by output declines in the marine & offshore engineering (M&OE) and land transport segments of 22% and 11% respectively. In particular, the M&OE segment remained weak on account of low levels of rig-building, shipbuilding and repair activities. For the full year 2017, the transport engineering cluster shrank by 6.9%, dragged down mainly by the M&OE segment.

The biomedical manufacturing cluster contracted by 28% in the fourth quarter 2017, weighed down by the pharmaceuticals segment (-37%) on the back of a drop in the production of active pharmaceutical ingredients and biological products. However, the medical technology segment, which grew at a healthy pace of 3.3%, provided some support to the cluster. For 2017 as a whole, output in the biomedical manufacturing cluster fell by 9.3%, led by the output decline in the pharmaceuticals segment.

CREDIT RISK EVALUATION & RECOMMENDATION

Incorporated in 1999, the Subject is a Sole Proprietorship, focusing on manufacturing and processing of petrochemicals. Having been in the industry for over a decade, the Subject has achieved a certain market share and has built up a satisfactory reputation in the market. It should have received supports from its regular customers.

Over the years, the Subject has penetrated into both the local and overseas market. The Subject has positioned itself in the global market and is competing in the industry. Its stable clientele base will enable the Subject to
