SINGAPORE - ECONOMIC OVERVIEW

Singapore has a highly developed and successful free-market economy. It enjoys an open and corruption-free environment, stable prices, and a per capita GDP higher than that of most developed countries. Unemployment is very low. The economy depends heavily on exports, particularly of electronics, petroleum products, chemicals, medical and optical devices, pharmaceuticals, and on Singapore's vibrant transportation, business, and financial services sectors.

The economy contracted 0.6% in 2009 as a result of the global financial crisis, but has continued to grow since 2010. Growth from 2012-2017 was slower than during the previous decade, a result of slowing structural growth - as Singapore reached high-income levels - and soft global demand for exports. Growth recovered to 3.6% in 2017 with a strengthening global economy.

The government is attempting to restructure Singapore's economy to reduce its dependence on foreign labor, raise productivity growth, and increase wages amid slowing labor force growth and an aging population. Singapore has attracted major investments in advanced manufacturing, pharmaceuticals, and medical technology production and will continue efforts to strengthen its position as Southeast Asia's leading financial and technology hub. Singapore is a signatory of the Comprehensive and Progressive Agreement for Trans-Pacific Partnership (CPTPP), and a party to the Regional Comprehensive Economic Partnership (RCEP) negotiations with nine other ASEAN members plus Australia, China, India, Japan, South Korea, and New Zealand. In 2015, Singapore formed, with the other ASEAN members, the ASEAN Economic Community.

HISTORY / BACKGROUND

The Subject is a private limited company and is allowed to have a minimum of one and a maximum of forty-nine shareholders. As a private limited company, the Subject must have at least two directors. A private limited company is a separate legal entity from its shareholders. As a separate legal entity, the Subject is capable of owning assets, entering into contracts, sue or be sued by other companies. The liabilities of the shareholders are to the extent of the equity they have taken up and the creditors cannot claim on shareholders' personal assets even if the Subject is insolvent. The Subject is governed by the Companies Act and the company must file its annual returns, together with its financial statements with the Registrar of Companies.

The Subject is principally engaged in the (as a / as an) trading of commodities, timber, textiles, iron ore, pharmaceuticals and its related products, investment holding.

The immediate and ultimate holding company of the Subject is SUREFAME LTD., a company incorporated in VIRGIN ISLANDS, BRITISH.

We have contacted one of the staff from the Subject and she provided some information.

FINANCIAL ANALYSIS

Profitability

Turnover	:	Erratic	[2013 - 2017]
Profit/(Loss) Before Tax	:	Decreased	[2013 - 2017]
Return on Shareholder Funds	:	Unfavourable	[6.21%]
Return on Net Assets	:	Unfavourable	[9.22%]

The fluctuating turnover reflects the fierce competition among the existing and new market players. The Subject's profit fell sharply because of the high operating costs incurred. The unfavourable return on shareholders' funds could indicate that the Subject was inefficient in utilising its assets to generate returns.

Working Capital Control

Stock Ratio	:	Favourable	[4 Days]
Debtor Ratio	:	Unfavourable	[68 Days]
Creditors Ratio	:	Favourable	[11 Days]

The Subject's stocks were moving fast thus reducing its holding cost. This had reduced funds being tied up in stocks. The high debtors' ratio could indicate that the Subject was weak in its credit control. However, the Subject could also giving longer credit periods to its customers in order to boost its sales or to capture / retain its market share. The Subject had a favourable creditors' ratio where the Subject could be taking advantage of the cash discounts and also wanting to maintain goodwill with its creditors.

Liquidity

Liquid Ratio	:	Favourable	[1.39 Times]
Current Ratio	:	Unfavourable	[1.45 Times]

A minimum liquid ratio of 1 should be maintained by the Subject in order to assure its creditors of its ability to meet short term obligations and the Subject was in a good liquidity position. Thus, we believe the Subject is able to meet all its short term obligations as and when they fall due.

Solvency

Interest Cover	:	Acceptable	[5.01 Times]
----------------	---	------------	---	------------	---

Gearing Ratio : Unfavourable [1.47 Times]

The Subject's interest cover was slightly low. If there is no sharp fall in its profit or sudden increase in the interest rates, we believe the Subject is able to generate sufficient income to service its interest and repay the loans. The Subject was highly geared, thus it had a high financial risk. The Subject was dependent on loans to finance its business needs. In times of economic downturn and / or high interest rate, the Subject will become less profitable and competitive than other firms in the same industry, which are lowly geared. This is because the Subject has to service the interest and to repay the loan, which will erode part of its profits. The profits will fluctuate depending on the Subject's turnover and the interest it needs to pay.

Overall Assessment :

The Subject recorded lower profits as its turnover showed an erratic trend. The Subject's management was unable to control its costs efficiently as its profit showed a downward trend. The Subject was in good liquidity position with its total current liabilities well covered by its total current assets. With its current net assets, the Subject should be able to repay its short term obligations. The Subject had an acceptable interest cover. If there is no sudden sharp increase in interest rate or fall in the Subject's profit, we do believe the Subject is able to generate sufficient cash flow to service its interest payment. The Subject's gearing level was high and its going concern will be in doubt if there is no injection of additional shareholders' funds in times of economic downturn and / or high interest rates.

Overall financial condition of the Subject : FAIR

growth in the previous quarter. The sectors which contributed the most to growth in the quarter were the manufacturing and finance & insurance sectors. For the whole of 2017, the economy expanded by 3.6%, higher than the 2.4% growth in 2016. All major sectors grew in 2017, with the exception of the construction sector. The manufacturing and finance & insurance sectors were the key contributors to overall GDP growth.

The manufacturing sector expanded by 4.8% in the fourth quarter 2017, slowing from the 19% surge in the third quarter. Growth was led by robust output expansions in the electronics and precision engineering clusters, which more than offset declines in the biomedical manufacturing and transport engineering clusters. For full year 2017, the manufacturing sector grew by 10%, higher than the 3.7% growth in 2016. Growth was primarily driven by the electronics and precision engineering clusters, while output declines in the biomedical manufacturing, transport engineering and general manufacturing clusters weighed on growth.

The services producing industries collectively expanded to 3.5% in the fourth quarter 2017, the same pace of growth as the previous quarter. Among the services sectors, the finance & insurance sector registered the strongest growth at 6.3%, followed by the information & communications (6.0%) and the transportation & storage (5.3%) sectors. Services producing industries as a whole expanded to 2.8% in full year 2017, faster than the 1.4% growth in 2016. All services sectors saw positive growth.

Among the services sectors, the transportation & storage and finance & insurance sectors registered the fastest pace of growth in 2017. Growth of the transportation & storage sector came in at 4.8%, a pickup from the 1.3% in 2016, largely due to stronger growth in the water transport and air transport segments. Similarly, the finance & insurance sector expanded by 4.8%, improving from the 1.6% growth in 2016. The robust performance of the sector was largely because of strong growth in the fund management segment, even as growth in the financial intermediation and insurance segments remained firm.

Besides, the construction sector contracted to 5.0%, extending the 9.3% decline in the third quarter 2017. The output of the sector was weighed down primarily by the weakness in private sector construction activities, as certified payments across all private construction segments declined. Meanwhile, the construction sector contracted to 8.4% in 2017, a reversal from the 1.9% growth in 2016. Output in the sector was primarily weighed down by the weakness in private sector construction works.

In the fourth quarter 2017, total demand rose by 4.9%, lower than the 5.5% growth in the preceding quarter. For the whole of 2017, growth in total demand came in at 4.4%, an improvement from the 1.6% in 2016. External demand was the key contributor to total demand growth (3.0 percentage-points), while the contribution from domestic demand was also positive (1.4 percentage-points).

Total domestic demand rose by 6.6 % in the fourth quarter 2017, following the 8.5% growth in the previous quarter. Growth was supported primarily by the build-up in inventories and also higher consumption expenditure. Gross fixed capital formation also contributed positively to total domestic demand growth in the quarter. For 2017 as a whole, total domestic demand increased by 5.4%, higher than the 3.1% expansion in 2016. Meanwhile, external demand rose by 4.2% in the fourth quarter 2017, similar to the 4.4% growth in the preceding quarter. The increase in external demand was primarily due to higher real merchandise exports. For the full year 2017, external demand grew at a faster pace of 4.1%, compared to the 1.1% growth in 2016.

Total consumption expenditure rose at a slower pace of 4.4% in the fourth quarter 2017, compared to the 5.7% expansion in the previous quarter. For the full year 2017, total consumption expenditure grew by 3.3%, an improvement from the 2.1% growth in 2016, on the back of faster growth in both public and private consumption. Public consumption expanded by 4.1%, compared to 3.5% in 2016, while private consumption grew by 3.1%, compared to 1.7% in the previous year. Expenditure on miscellaneous goods & services, recreation & culture and housing & utilities were the main contributors to private consumption growth.

Since November 2017, the outlook for global growth has improved slightly with the IMF upgrading its global growth forecast for 2018 to 3.9%, partly on the back of higher growth expected in the US due to the recently approved tax reforms. However, as compared to 2017, growth in most of Singapore's key final demand markets such as the Eurozone, Japan, NIEs and ASEAN-5 is projected to moderate or remain unchanged in 2018. In the US, GDP growth is projected to improve further in 2018, supported by domestic demand and fiscal stimulus arising from the recently approved tax reforms, although there are uncertainties around the extent to which

investments would respond to the tax reforms. On the other hand, growth in the Eurozone economy is projected to moderate in 2018, following the rebound seen in 2017. Growth will be underpinned by continued improvements in labour market conditions and largely accommodative monetary policies.

In Asia, China's growth is also expected to ease in 2018 on the back of a slowdown in investment, even as consumption is likely to remain stable and provide support to growth. Meanwhile, growth in the key ASEAN economies is expected to remain firm in 2018, supported by sustained improvements in domestic demand as well as merchandise exports. On balance, the external demand outlook for Singapore is expected to be slightly weaker in 2018 as compared to 2017. Taking into account the global and domestic economic environments, Ministry of Trade and Industry (MTI) has maintained the 2018 GDP growth forecast at "1.5 to 3.5%". MTI's central view is that growth will likely come in slightly above the middle of the forecast range, barring the materialisation of downside risks.

OVERALL INDUSTRY OUTLOOK : MARGINAL GROWTH

CREDIT RISK EVALUATION & RECOMMENDATION

Incorporated in 1994, the Subject is a Private Limited company, focusing on trading of commodities, timber, textiles, iron ore, pharmaceuticals and its related products, investment holding. The Subject has been in business for over two decades. It has built up a strong clientele base and satisfactory reputation will enable the Subject to further enhance its business in the near term. The Subject is expected to enjoy a stable market shares. A paid up capital of SGD 8,000,000 allows the Subject to expand its business more comfortably. With a strong backing from its holding company, the Subject enjoys timely financial assistance should the needs arise.

Over the years, the Subject has penetrated into both the local and overseas market. The Subject has positioned itself in the global market and is competing in the industry. Its stable clientele base will enable the Subject to further enhance its business in the near term. The Subject's business operation is supported by 35 employees. Overall, we regard that the Subject's management capability is average. This indicates that the Subject has greater potential to improve its business performance and raising income for the Subject.

Financially, the Subject registered a higher turnover compared to previous year. However, its profits showed a reverse trend. The lower profit achieved was a result of higher operating cost and increased competition. The Subject has generated an unfavourable return on shareholders' funds indicating that the management was inefficient in utilising its funds to generate return. The Subject is in good liquidity position with its current liabilities well covered by its current assets. Hence, it has sufficient working capital to meet its short term financial obligations. The high gearing ratio clearly implied that the Subject was supported by more debt than equity. Thus, the Subject is exposed to high financial risk. Given a positive net worth standing at USD 25,242,586, the Subject should be able to maintain its business in the near terms.

The Subject's payment habit is average. With its adequate working capital, the Subject should be able to pay its short term debts.

The industry has reached its maturity stage and only enjoying a marginal growth. The steady growth of the country's economy will further enhance the industry activities. Thus, the Subject's future performance is very much depend on its marketing strategies in order to retain its position in the market.

Based on the above condition, we recommend credit be granted to the Subject normally.

RATING EXPLANATIONS

Credit Rating	Explanation	Rating Comments
A++	Minimum Risk	Business dealings permissible with minimum risk of default
A+	Low Risk	Business dealings permissible with low risk of default
A	Acceptable Risk	Business dealings permissible with moderate risk of default
B	Medium Risk	Business dealings permissible on a regular monitoring basis
C	Medium High Risk	Business dealings permissible preferably on secured basis
D	High Risk	Business dealing not recommended or on secured terms only
NB	New Business	No recommendation can be done due to business in infancy stage
NT	No Trace	No recommendation can be done as the business is not traceable

NB is stated where there is insufficient information to facilitate rating. However, it is not to be considered as unfavourable.

This score serves as a reference to assess SC's credit risk and to set the amount of credit to be extended. It is calculated from a composite of weighted scores obtained from each of the major sections of this report. The assessed factors are as follows:

- Financial condition covering various ratios
- Company background and operations size
- Promoters / Management background
- Payment record
- Litigation against the subject
- Industry scenario / competitor analysis
- Supplier / Customer / Banker review (wherever available)
