REVIEW OF OPERATIONS

The turnover of the relevant year increased to INR 4787.150 Million as compared to INR 4597.130 Million in the previous year. The company made a Loss before Tax of INR 216.840 Million as compared to INR 274.390 Million last year. Operating Loss (before interest, other income and depreciation) for the year increased to INR 136.000 Million compared to INR 131.000 Million last year. Higher operating losses for the year are mainly on account of increase in cost of imported material and appreciation of Euro against Indian Rupees. However higher other income and lower depreciation charge resulted in lower losses before tax compared to previous year.

ELECTRICAL STEEL: OVE RVIEW AND OUTLOOK

CRNGO:

The company continues to suffer from overcapacity in the market with stable demand. The Government's intention of protecting domestic integrated mills only severally affects the company as there is anti-dumping duty on import of HR coils from China and 5 other countries while there is no protection for the finished material CRNGO. In the absence of uptick in robust demand, the company focused only on niche volumes and grades that led to significant drop in the sales volume for the year.

CRGO:

The company decided to shift the portfolio from CRNGO to CRGO, company took preeminent step of developing the market first hence imported fully finished CRGO from the European plants and sold the material in the domestic market. On one side it helped to keep the turnover comparable to previous year despite significant drop in CRNGO sales volume, on the other side, company could test and develop the potential customers for CRGO ahead of capacity creation.

The planned investment in CRGO on the date of reporting is fully executed and fully finished CRGO production from hot rolled coils onwards is under optimization level. The demand for CRGO remains positively stable thus providing an opportunity to the company to be successful in the near future.

GENERAL INFORMATION

Subject the Company is a wholly owned subsidiary of thyssenkrupp Electrical Steel GmbH. The Company is engaged into manufacturing of low carbon cold rolled electrical and mild steel. The Company has manufacturing plant located in Nashik, India and caters primarily to customers located in Indian market.
