MALAYSIA - ECONOMIC OVERVIEW

Malaysia, an upper middle-income country, has transformed itself since the 1970s from a producer of raw materials into a multi-sector economy. Under current Prime Minister NAJIB, Malaysia is attempting to achieve high-income status by 2020 and to move further up the value-added production chain by attracting investments in high technology, knowledge-based industries and services. NAJIB's Economic Transformation Program is a series of projects and policy measures intended to accelerate the country's economic growth. The government has also taken steps to liberalize some services sub-sectors. Malaysia is vulnerable to a fall in world commodity prices or a general slowdown in global economic activity.

The NAJIB administration is continuing efforts to boost domestic demand and reduce the economy's dependence on exports. Domestic demand continues to anchor economic growth, supported mainly by private consumption, which accounts for 53% of GDP. Nevertheless, exports - particularly of electronics, oil and gas, and palm oil - remain a significant driver of the economy. In 2015, gross exports of goods and services were equivalent to 73% of GDP. The oil and gas sector supplied about 22% of government revenue in 2015, down significantly from prior years amid a decline in commodity prices and diversification of government revenues. Malaysia has embarked on a fiscal reform program aimed at achieving a balanced budget by 2020, including rationalization of subsidies and the 2015 introduction of a 6% value added tax. Sustained low commodity prices throughout the period not only strained government finances, but also shrunk Malaysia's current account surplus and weighed heavily on the Malaysian ringgit, which was among the region's worst performing currencies during 2013-17. The ringgit hit new lows following the US presidential election amid a broader selloff of emerging market assets.

Bank Negara Malaysia (the central bank) maintains adequate foreign exchange reserves; a well-developed regulatory regime has limited Malaysia's exposure to riskier financial instruments, although it remains vulnerable to volatile global capital flows. In order to increase Malaysia's competitiveness, Prime Minister NAJIB raised possible revisions to the special economic and social preferences accorded to ethnic Malays under the New Economic Policy of 1970, but retreated in 2013 after he encountered significant opposition from Malay nationalists and other vested interests. In September 2013 NAJIB launched the new Bumiputra Economic Empowerment Program, policies that favor and advance the economic condition of ethnic Malays.

Malaysia signed the 12-nation Trans-Pacific Partnership (TPP) free trade agreement in February 2016, although the future of the TPP remains unclear following the US withdrawal from the agreement. Along with nine other ASEAN members, Malaysia established the ASEAN Economic Community in 2015, which aims to advance regional economic integration.

YEAR 2018

GROUP N/A
COMPANY 300

Branch : NO
Other Information:

The Subject is principally engaged in the (as a / as an) processing and sales of rubber and latex.

The Subject's products has undergone stringent quality control in every stage of the production process which has resulted in the recognition by the Standard and Industrial Research Institute of Malaysia (SIRIM).

We were informed that the Subject's core product is Standard Malaysia Rubber or SMR.

Besides that the Subject also has a warehouse to keep stocks and materials.

The Subject's goal to make the highest quality natural rubber.

Its vision is to become the one of the region's top recognized rubber manufacturers and among the world's leading natural rubber suppliers.

RECENT DEVELOPMENT

We have checked with the Malaysian National News Agency's (BERNAMA) database, but no recent development was noted during the time of inspection.

Other Investigations

We contacted one of the staff from the Subject and she provided some information on the Subject.

The address provided is the Subject's PO box address.

FINANCIAL ANALYSIS

Profitability

Turnover	:	Erratic	[	2013 - 2017	]
Profit(Loss) Before Tax	:	Decreased	[	2013 - 2017	]
Return on Shareholder Funds	:	Unfavourable	[	5.83%	]
Return on Net Assets	:	Acceptable	[	13.52%	]

The fluctuating turnover reflects the fierce competition among the existing and new market players. The dip in profit could be due to the stiff market competition which reduced the Subject's profit margin. The unfavourable return on shareholders' funds could indicate that the Subject was inefficient in utilising its assets to generate returns.

Working Capital Control

Stock Ratio	:	Unfavourable	[	77 Days	]
Debtor Ratio	:	Favourable	[	25 Days	]
Creditors Ratio	:	Favourable	[	1 Days	]

The Subject could be incurring higher holding cost. As its capital was tied up in stocks, it could face liquidity problems. The favourable debtors' days could be due to the good credit control measures implemented by the Subject. The Subject had a favourable creditors' ratio where the Subject could be taking advantage of the cash discounts and also wanting to maintain goodwill with its creditors.

Liquidity

Liquid Ratio	:	Unfavourable	[	0.47 Times	]
Current Ratio	:	Unfavourable	[	1.05 Times	]

A low liquid ratio means that the Subject may be facing working capital deficiency. If the Subject cannot obtain

TIONG HUAT RUBBER FACTORY SDN BHD - 536900

PAGE NO. : 425

additional financing or injection of fresh capital, it may face difficulties in meeting its short term obligations.

Solvency

Interest Cover	:	Unfavourable	[	2.13 Times	]
Gearing Ratio	:	Unfavourable	[	2.52 Times	]

The Subject's interest cover was low. If its profits fall or when interest rate rises, it may not be able to meet all its interest payment. The Subject was highly geared, thus it had a high financial risk. The Subject was dependent on loans to finance its business needs. In times of economic downturn and / or high interest rate, the Subject will become less profitable and competitive than other firms in the same industry, which are lowly geared. This is because the Subject has to service the interest and to repay the loan, which will erode part of its profits. The profits will fluctuate depending on the Subject's turnover and the interest it needs to pay.

Overall Assessment :

The Subject recorded lower profits as its turnover showed a erratic trend. The Subject's management was unable to control its costs efficiently as its profit showed a downward trend. Due to its weak liquidity position, the Subject will be faced with problems in meeting all its short term obligations if no short term loan is obtained or additional capital injected into the Subject. If there is a fall in the Subject's profit or any increase in interest rate, the Subject may not be able to generate sufficient cash-flow to service its interest. The Subject's gearing level was high and its going concern will be in doubt if there is no injection of additional shareholders' funds in times of economic downturn and / or high interest rates.

Overall financial condition of the Subject : POOR

INDUSTRY NATURAL RUBBER

:

In the last decade, the world natural rubber industry has undergone very rapid and fundamental changes with the appearance of many new players, in particular the growth of some traditional suppliers and the emergence of new ones. Much of the changes and consequent challenges, both internally and externally, have impacted on Malaysia's comparative and competitive advantage in natural rubber cultivation.

According to Malaysian Rubber Board (MRB), the global natural rubber consumption growth in 2017 was projected to increase marginally by between 1.9% and 2.3% as demand increased in the region in line with a modest improvement in economic growth. The production level is expected to give some positive sentiment to the rubber market and average natural rubber price for 2017. It is estimated to increase slightly due to more favourable market conditions.

According to MRB, demand for rubber and rubber products for 2017 expected to increase marginally with export earnings set to perk to RM33.5bil from RM31bil in 2016. Besides that, the national rubber production for 2017 was estimated to increase by 5% year-on-year to 680,000 tonnes.

As an incentive to registered rubber smallholders, the Government will implement the purchase of floor price with an allocation of RM250 million under Budget 2017. As an additional measure, the Government will introduce

Rainy Season Assistance with an amount of RM200 monthly for 3 months in November, December and January, benefitting 440,000 rubber tappers and smallholders.

In 2016, total world production of rubber reached 26.9 million tonnes, growing at an annual average rate of 2.2% from 23.7 million tonnes in 2010. Natural rubber, with production estimated at 12.3 million tonnes, accounted for 46% of world rubber production, while synthetic rubber production accounted for 54%, with production in 2016 estimated at 14.6 million tonnes.

Malaysia is the world's fifth largest producer of natural rubber after Thailand, Indonesia, Vietnam and China. According to statistics provided by Malaysian Rubber Board (MRB), natural rubber production in Malaysia decreased by 6.6% from 0.72 million tonnes in 2015 to 0.67 million tonnes in 2016. Exports of natural rubber recorded a decline of 10.7% from 1.1 million tonnes in 2015 to 1.0 million tonnes in 2016. Nonetheless, Malaysia is still a net exporter of natural rubber. Consumption of natural rubber increased by 4% from 474.7 million tonnes in 2015 to 493.5 million tonnes in 2016.

Exports of rubber products from Malaysia surpassed RM18 billion in 2016, recording a growth of 0.9% year-on-year. The growth in exports was fuelled by the non-latex goods category, where footwear reported strong export performance with a growth of 28% from 2015, along with 5% expansion in the general rubber goods segment. Seals and gaskets, automotive parts and accessories, floor coverings and mats, as well as fenders were among the high growth products in the general rubber goods category. Nonetheless, the latex goods remained the largest contributor to Malaysian exports of rubber products, reaching RM14.6 billion in 2016 and accounted for 80.7% of the total exports of rubber products in the year. Rubber gloves under the latex goods category continued to contribute significantly to total exports of rubber products, reaching RM13.3 billion in export value or 73.2% of the total value of all rubber products exported.

The sector has had a continuous growth and maintained the country's dominant position as the world's leading producer and exporter of rubber gloves, supplying 63% of the world market – in which is interesting to mention, is now very far ahead of the non-latex sectors in the areas.

OVERALL INDUSTRY OUTLOOK : Mature

CREDIT RISK EVALUATION & RECOMMENDATION

Incorporated in 1969, the Subject is a Private Limited company, focusing on processing and sales of rubber and latex. The Subject has been in business for over two decades. It has built up a strong clientele base and satisfactory reputation will enable the Subject to further enhance its business in the near term. The Subject is expected to enjoy a stable market shares. A paid up capital of MYR 5,000,000 allows the Subject to expand its business more comfortably. With a strong backing from its holding company, the Subject enjoys timely financial assistance should the needs arise.

Over the years, the Subject has established an extensive clientele base in the market. Besides catering to the local market, the Subject has penetrated into other countries. With the contribution of both local and overseas customers, the Subject is likely to be exposed to lower commercial risk. Hence, we believe that the Subject has better business expansion opportunities in the future. The Subject is a rapidly growing company with over 300 staff in its operations Overall, we regard that the Subject's management capability is average. This indicates that the Subject has greater potential to improve its business performance and raising income for the Subject.

Financially, the Subject registered a higher turnover compared to previous year. However, its profits showed a reverse trend. The lower profit achieved was a result of higher operating cost and increased competition. The Subject has generated an unfavourable return on shareholders' funds indicating that the management was inefficient in utilising its funds to generate return. Due to its weak liquidity position, the Subject may face working

DISCLAIMER : This Report is **PRIVATE & CONFIDENTIAL** and it is prepared at the request of and for its use by the Subscriber only. PAGE NO. : 429

capital deficiency in meeting its short term financial obligations if no fresh capital are injected into the Subject. The high gearing ratio clearly implied that the Subject was supported by more debt than equity. Thus, the Subject is exposed to high financial risk. Given a positive net worth standing at MYR 223,793,616, the Subject should be able to maintain its business in the near terms.

The Subject's supplier are from both the local and overseas countries. This will eliminates the risk of dependency on deliveries from a number of key suppliers and insufficient quantities of its raw materials. Overall the Subject has a good control over its resources.

The Subject's payment habit is average. With its adequate working capital, the Subject should be able to pay its short term debts.

The industry has reached its optimum level and is generally stable. It is saturated and very competitive. Thus, the Subject's growth prospect is very much depends on its capacity in sustaining its performance in the market.

Based on the above condition, we recommend credit be granted to the Subject normally.

RATING EXPLANATIONS

Credit Rating	Explanation	Rating Comments
A++	Minimum Risk	Business dealings permissible with minimum risk of default
A+	Low Risk	Business dealings permissible with low risk of default
A	Acceptable Risk	Business dealings permissible with moderate risk of default
B	Medium Risk	Business dealings permissible on a regular monitoring basis
C	Medium High Risk	Business dealings permissible preferably on secured basis
D	High Risk	Business dealing not recommended or on secured terms only
NB	New Business	No recommendation can be done due to business in infancy stage
NT	No Trace	No recommendation can be done as the business is not traceable

NB is stated where there is insufficient information to facilitate rating. However, it is not to be considered as unfavourable.

This score serves as a reference to assess SC's credit risk and to set the amount of credit to be extended. It is calculated from a composite of weighted scores obtained from each of the major sections of this report. The assessed factors are as follows:

- Financial condition covering various ratios
- Company background and operations size
- Promoters / Management background
- Payment record
- Litigation against the subject
- Industry scenario / competitor analysis
- Supplier / Customer / Banker review (wherever available)
