PERFORMANCE REVIEW

During the year 2017-18, India's overall GDP growth was seen decelerating to 6.5% but is expected to rise to 7-7.5% in 2018-19. This is primarily due to landmark reforms undertaken by the Government in 2017. The transformational Goods and Services Tax (GST) was launched at the stroke of midnight on July 1, 2017. The long-festering Twin Balance Sheet (TBS) problem was decisively addressed by sending the major stressed companies for resolution under the new Indian Bankruptcy Code and implementing a major recapitalization package to strengthen the public- sector banks.

The Power sector today is struggling with 70GW+ of stranded assets due to lack of PPA and coal linkages. This has significantly slowed down the investments in ultra-high thermal capacity addition. However, this phenomenon has been largely balanced by the continuing investments in the renewable -Solar & Wind space. This shift in generation fuel has also impacted the changing dynamics of transmission and distribution space. As a result, the EHV grid investments of 800kV are now gradually moving towards sub-transmission grids of 220kV and below. This change in voltage profile of the grid demands a new range of product and project solutions in the market.

In recent years, India has been witnessing falling solar tariffs. While this has a positive impact on the cost of procuring power, it has also initiated certain discussions about renegotiation of already signed power purchase agreements (PPAs) by certain states. Parallely, the Solar developers were also dealing with the revised tax imposed on Solar panels which resulted in supply chain issues and subsequent project delays by the developers. Due to this uncertain environment, the solar capacity addition during the year fell significantly. However, the overall capacity addition plan is on track and expected to see more momentum in 2018-19.

During the year, Government of India announced the 'Saubhagya' scheme to provide energy access to all by last mile connectivity and electricity connections to all remaining un-electrified households in rural and urban areas to achieve universal household electrification in the country. This will ensure that State Utilities strengthen their T&D networks and improve operational efficiencies to cater to the increased consumer base.

Industry in India is today seeing resolution of NPAs and stressed balanced sheets being overtaken by new investors. This consolidation and resolution in the industry is expected to improve capex in the coming years and give rise to additional demand for power.

Overall, despite the extremely challenging market, the Company successfully achieved a balanced portfolio of orders, resulting in sustained market leadership and improved overall performance. In addition, the Company ensured a healthy backlog of orders.

MANAGEMENT AND DISCUSSING ANALYSIS

MARKET OVERVIEW

The year 2017-18 witnessed moderate growth in the Transmission and Distribution market, which is now gradually moving towards a recovery, primarily driven by Government of India's (GOI) growing investments in renewable power generation and investments aimed towards upgradation of country's ageing transmission systems. However, the power sector continues to struggle with stranded power generation capacity, poor industrial demand and high AT&C losses in DISCOMs. All such challenges can be met but require investment and adoption of latest technologies across the value chain of power sector.

OUTLOOK

The long-term outlook for transmission and distribution sector remains positive as the bulk power generated in the country needs grid infrastructure for reliable, efficient and stable power supply to the end consumer. The government's bold moves in resolution of NPAs, recovering ailing DISCOMs and change in policy framework towards ease of doing business is a positive move towards ramping up the investments in the infrastructure space. Your Company is overall optimistic that various reforms initiated by Government of India will lead to revival of the economy. Primarily due to increase in capital expenditure in utilities, power generation, industry and infrastructure that follow these reforms. Your Company is fully prepared to address the resulting growth opportunities.

The strong thrust on renewable power generation, evacuation and integration of clean energy has opened new market opportunities within the power sector. Strengthening of sub-transmission network under the Integrated Power Development Scheme (IPDS) and deployment of Power System Development Fund (PSDF) creates new markets for transmission and distribution products.

The Company's management team remains holistically focused on new opportunities and is committed to deliver increased value for its stakeholders.

Notes:

1) Pending resolution of the respective proceedings, it is not practicable for the Company to estimate the timing of cash outflows, if any, in respect of the above as it is determinable only on receipt of judgment / decisions pending with various forums / authorities.

2) The Company has reviewed all its pending litigations and proceedings and has adequately provided for where provisions are required and disclosed as contingent liabilities where applicable, in its financial statements. The Company does not expect the outcome of these proceedings to have a material adverse effect on its financial position. The Company does not expect any reimbursements in respect of above contingent liabilities.

3) The Company is directly or indirectly involved in other lawsuits, claims and proceedings, which arise in the ordinary course of business. The Company have challenged these litigation with respective authorities. Based on the facts currently available, management believes that likelihood of outflow of resources is remote and hence the Company has not recognised these litigations under contingent liability as well.

4) During the year, the Company's internal reviews identified some weaknesses in carrying out certain testing procedures in respect of certain products. The management has taken corrective steps to strengthen these procedures and is communicating with the relevant stakeholders. No claims have been made on the Company so far. At this point of time, it is not possible to assess/estimate the extent and impact, if any, of the same.

Notes:

1. The Company is engaged in the business relating to products, projects and systems for electricity transmission and related activities only. Accordingly, the Company has only one operating segment.
2. Post the applicability of Goods and Service Tax (GST) w.e.f. July 2017, Revenue from Operations are required to be disclosed net of GST in accordance with the requirements of Ind AS. Accordingly, the Revenue from Operations for the quarter ended 30 June 2018 is not comparable with the corresponding quarter ended 30 June 2017 presented in the financial results which is reported inclusive of Excise Duty.
3. During the quarter ended 31 March 2018, the Company had reassessed taxes related to earlier years due to which provision for tax and deferred tax assets were reduced by Rs. 564.6 million.
4. Revenue recognition - Effective 1 April 2018, the Company adopted Ind AS 115. "Revenue from Contracts with Customers" using the cumulative catch-up transition method, as the transitional provision option available to the Company. The Company also reassessed the revenue recognition method in respect of measuring percentage of completion for applicable products/ services projects.

The key changes in accounting policies included non-discounting of retention money as it is considered to ensure Company's obligation rather than provision of finance to the customer and change in method of

measuring percentage of completion measured by segmented portions of the contract, i.e. Contract Milestones achieved to actual costs incurred.

It is impracticable to determine the adjustments/ impact of the above changes on the comparatives and current quarter results. Accordingly, the comparatives have not been retrospectively adjusted, i.e it is presented, as previously reported, under earlier revenue recognition standards. As a result, the cumulative effect of Rs.817.1 million (net of tax impact Rs.424.1 million) has been recognized a& addition to retained earnings as at 1 April 2018.

5. The above unaudited financial results were reviewed by the Audit Committee and approved by the Board of Directors at its meeting held on 25 July 2018. The unaudited results for the quarter ended 30 June 2018 have been subjected to limited review by the Statutory Auditor of the Company.
6. The review report of the Statutory Auditor is being filed with BSE Limited, National Stock Exchange of India Limited and Calcutta Stock Exchange Limited.
