SPAIN - ECONOMIC OVERVIEW

After a prolonged recession that began in 2008 in the wake of the global financial crisis, Spain marked the fourth full year of positive economic growth in 2017, with economic activity surpassing its pre-crisis peak, largely because of increased private consumption. The financial crisis of 2008 broke 16 consecutive years of economic growth for Spain, leading to an economic contraction that lasted until late 2013. In that year, the government successfully shored up its struggling banking sector - heavily exposed to the collapse of Spain's real estate boom - with the help of an EU-funded restructuring and recapitalization program.

Until 2014, contraction in bank lending, fiscal austerity, and high unemployment constrained domestic consumption and investment. The unemployment rate rose from a low of about 8% in 2007 to more than 26% in 2013, but labor reforms prompted a modest reduction to 16.4% in 2017. High unemployment strained Spain's public finances, as spending on social benefits increased while tax revenues fell. Spain's budget deficit peaked at 11.4% of GDP in 2010, but Spain gradually reduced the deficit to about 3.3% of GDP in 2017. Public debt has increased substantially – from 60.1% of GDP in 2010 to nearly 96.7% in 2017.

Strong export growth helped bring Spain's current account into surplus in 2013 for the first time since 1986 and sustain Spain's economic growth. Increasing labor productivity and an internal devaluation resulting from moderating labor costs and lower inflation have improved Spain's export competitiveness and generated foreign investor interest in the economy, restoring FDI flows.

In 2017, the Spanish Government's minority status constrained its ability to implement controversial labor, pension, health care, tax, and education reforms. The European Commission expects the government to meet its 2017 budget deficit target and anticipates that expected economic growth in 2018 will help the government meet its deficit target. Spain's borrowing costs are dramatically lower since their peak in mid-2012, and increased economic activity has generated a modest level of inflation, at 2% in 2017.

Summary

The 2017 financial result structure is a positive working capital of 158.505.000 euro, which is in agreement with 4 % of the total assets of the company.

The working capital has increased with 304.06 % compared to previous year. The ratio, with respect to the total assets of the company has however, increased.

The improvement between 2016 and 2017 has mainly been caused by a change of the current assets.

The current ratio of the company in 2017 was 1.12. When the current ratio is below 1.5, the company may have problems meeting its short-term obligations.

The quick ratio in 2017 of the company was 1.12. A company with a Quick Ratio of more than 1 can currently pay back its current liabilities.

The 2016 financial result structure is a negative working capital of -77.675.000 euro, which is in agreement with -2 % of the total assets of the company.

The working capital has increased with 3.51 % compared to previous year. The ratio with respect to the total assets of the company remains unchanged.

The improvement between 2015 and 2016 has mainly been caused by a change of the current assets.

The current ratio of the company in 2016 was 0.95. When the current ratio is below 1.5, the company may have problems meeting its short-term obligations.

The quick ratio in 2016 of the company was 0.94. A company with a Quick Ratio of less than 1 cannot currently pay back its current liabilities.

RATING EXPLANATIONS

Credit Rating	Explanation	Rating Comments
A++	Minimum Risk	Business dealings permissible with minimum risk of default
A+	Low Risk	Business dealings permissible with low risk of default
A	Acceptable Risk	Business dealings permissible with moderate risk of default
B	Medium Risk	Business dealings permissible on a regular monitoring basis
C	Medium High Risk	Business dealings permissible preferably on secured basis
D	High Risk	Business dealing not recommended or on secured terms only
NB	New Business	No recommendation can be done due to business in infancy stage
NT	No Trace	No recommendation can be done as the business is not traceable

NB is stated where there is insufficient information to facilitate rating. However, it is not to be considered as unfavourable.

This score serves as a reference to assess SC's credit risk and to set the amount of credit to be extended. It is calculated from a composite of weighted scores obtained from each of the major sections of this report. The assessed factors are as follows:

- Financial condition covering various ratios
- Company background and operations size
- Promoters / Management background
- Payment record
- Litigation against the subject
- Industry scenario / competitor analysis
- Supplier / Customer / Banker review (wherever available)
