SINGAPORE - ECONOMIC OVERVIEW

Singapore has a highly developed and successful free-market economy. It enjoys an open and corruption-free environment, stable prices, and a per capita GDP higher than that of most developed countries. Unemployment is very low. The economy depends heavily on exports, particularly of electronics, petroleum products, chemicals, medical and optical devices, pharmaceuticals, and on Singapore's vibrant transportation, business, and financial services sectors.

The economy contracted 0.6% in 2009 as a result of the global financial crisis, but has continued to grow since 2010. Growth from 2012-2017 was slower than during the previous decade, a result of slowing structural growth - as Singapore reached high-income levels - and soft global demand for exports. Growth recovered to 3.6% in 2017 with a strengthening global economy.

The government is attempting to restructure Singapore's economy to reduce its dependence on foreign labor, raise productivity growth, and increase wages amid slowing labor force growth and an aging population. Singapore has attracted major investments in advanced manufacturing, pharmaceuticals, and medical technology production and will continue efforts to strengthen its position as Southeast Asia's leading financial and technology hub. Singapore is a signatory of the Comprehensive and Progressive Agreement for Trans-Pacific Partnership (CPTPP), and a party to the Regional Comprehensive Economic Partnership (RCEP) negotiations with nine other ASEAN members plus Australia, China, India, Japan, South Korea, and New Zealand. In 2015, Singapore formed, with the other ASEAN members, the ASEAN Economic Community.

* Estimate / Preliminary

Based on Index of Industrial Production (2015 = 100)

INDUSTRY ANALYSIS

INDUSTRY ECONOMY

:

In the fourth quarter of 2017, the economy grew by 3.6% on a year-on-year basis, moderating from the 5.5% growth in the previous quarter. The sectors which contributed the most to growth in the quarter were the manufacturing and finance & insurance sectors. For the whole of 2017, the economy expanded by 3.6%, higher than the 2.4% growth in 2016. All major sectors grew in 2017, with the exception of the construction sector. The manufacturing and finance & insurance sectors were the key contributors to overall GDP growth.

The manufacturing sector expanded by 4.8% in the fourth quarter 2017, slowing from the 19% surge in the third quarter. Growth was led by robust output expansions in the electronics and precision engineering clusters, which more than offset declines in the biomedical manufacturing and transport engineering clusters. For full year 2017, the manufacturing sector grew by 10%, higher than the 3.7% growth in 2016. Growth was primarily driven by the electronics and precision engineering clusters, while output declines in the biomedical manufacturing, transport engineering and general manufacturing clusters weighed on growth.

The services producing industries collectively expanded to 3.5% in the fourth quarter 2017, the same pace of growth as the previous quarter. Among the services sectors, the finance & insurance sector registered the strongest growth at 6.3%, followed by the information & communications (6.0%) and the transportation & storage (5.3%) sectors. Services producing industries as a whole expanded to 2.8% in full year 2017, faster than the 1.4% growth in 2016. All services sectors saw positive growth.

Among the services sectors, the transportation & storage and finance & insurance sectors registered the fastest pace of growth in 2017. Growth of the transportation & storage sector came in at 4.8%, a pickup from the 1.3% in 2016, largely due to stronger growth in the water transport and air transport segments. Similarly, the finance & insurance sector expanded by 4.8%, improving from the 1.6% growth in 2016. The robust performance of the sector was largely because of strong growth in the fund management segment, even as growth in the financial

DISCLAIMER : This Report is **PRIVATE & CONFIDENTIAL** and it is prepared at the request of and for its use by the Subscriber only. The Subscriber shall use the contents of the Report merely as an aid to its business. Mira Inform Private Limited ("MIPL") has collated information/data in the Report, which have not been verified unless otherwise specifically mentioned in the Report. The Subscriber shall independently verify the accuracy and correctness of the information/data before in any way acting upon the same. MIPL shall not be liable for any harm, injury, loss or damage caused to the Subscriber due to default by the Subscriber's debtors/beneficiaries in fulfilling their obligations of any nature whatsoever. This Report or any of its portion shall not be used as a documentary evidence or otherwise before any investigative agencies or forum of law. This Report is confidential and proprietary to MIPL. The Subscriber and/or any other person(s) may not reproduce, publish or disclose any of the contents of the Report to others without the express authorization of MIPL. This Report is prepared and issued to the Subscriber without any risk, responsibility or liability on the part of MIPL or its officials.

intermediation and insurance segments remained firm.

Besides, the construction sector contracted to 5.0%, extending the 9.3% decline in the third quarter 2017. The output of the sector was weighed down primarily by the weakness in private sector construction activities, as certified payments across all private construction segments declined. Meanwhile, the construction sector contracted to 8.4% in 2017, a reversal from the 1.9% growth in 2016. Output in the sector was primarily weighed down by the weakness in private sector construction works.

In the fourth quarter 2017, total demand rose by 4.9%, lower than the 5.5% growth in the preceding quarter. For the whole of 2017, growth in total demand came in at 4.4%, an improvement from the 1.6% in 2016. External demand was the key contributor to total demand growth (3.0 percentage-points), while the contribution from domestic demand was also positive (1.4 percentage-points).

Total domestic demand rose by 6.6 % in the fourth quarter 2017, following the 8.5% growth in the previous quarter. Growth was supported primarily by the build-up in inventories and also higher consumption expenditure. Gross fixed capital formation also contributed positively to total domestic demand growth in the quarter. For 2017 as a whole, total domestic demand increased by 5.4%, higher than the 3.1% expansion in 2016. Meanwhile, external demand rose by 4.2% in the fourth quarter 2017, similar to the 4.4% growth in the preceding quarter. The increase in external demand was primarily due to higher real merchandise exports. For the full year 2017, external demand grew at a faster pace of 4.1%, compared to the 1.1% growth in 2016.

Total consumption expenditure rose at a slower pace of 4.4% in the fourth quarter 2017, compared to the 5.7% expansion in the previous quarter. For the full year 2017, total consumption expenditure grew by 3.3%, an improvement from the 2.1% growth in 2016, on the back of faster growth in both public and private consumption. Public consumption expanded by 4.1%, compared to 3.5% in 2016, while private consumption grew by 3.1%, compared to 1.7% in the previous year. Expenditure on miscellaneous goods & services, recreation & culture and housing & utilities were the main contributors to private consumption growth.

Since November 2017, the outlook for global growth has improved slightly with the IMF upgrading its global growth forecast for 2018 to 3.9%, partly on the back of higher growth expected in the US due to the recently approved tax reforms. However, as compared to 2017, growth in most of Singapore's key final demand markets such as the Eurozone, Japan, NIEs and ASEAN-5 is projected to moderate or remain unchanged in 2018. In the US, GDP growth is projected to improve further in 2018, supported by domestic demand and fiscal stimulus arising from the recently approved tax reforms, although there are uncertainties around the extent to which investments would respond to the tax reforms. On the other hand, growth in the Eurozone economy is projected to moderate in 2018, following the rebound seen in 2017. Growth will be underpinned by continued improvements in labour market conditions and largely accommodative monetary policies.

In Asia, China's growth is also expected to ease in 2018 on the back of a slowdown in investment, even as consumption is likely to remain stable and provide support to growth. Meanwhile, growth in the key ASEAN economies is expected to remain firm in 2018, supported by sustained improvements in domestic demand as well as merchandise exports. On balance, the external demand outlook for Singapore is expected to be slightly weaker in 2018 as compared to 2017. Taking into account the global and domestic economic environments, Ministry of Trade and Industry (MTI) has maintained the 2018 GDP growth forecast at "1.5 to 3.5%". MTI's central view is that growth will likely come in slightly above the middle of the forecast range, barring the materialisation of downside risks.

OVERALL INDUSTRY OUTLOOK : MARGINAL GROWTH

CREDIT RISK EVALUATION & RECOMMENDATION

Incorporated in 2017, the Subject is a Sole Proprietorship, focusing on technology management, business consulting, software development. The Subject has been in business for less than 5 years and it has slowly been

DISCLAIMER : This Report is **PRIVATE & CONFIDENTIAL** and it is prepared at the request of and for its use by the Subscriber only. The Subscriber shall use the contents of the Report merely as an aid to its business. Mira Inform Private Limited ("MIPL") has collated information/data in the Report, which have not been verified unless otherwise specifically mentioned in the Report. The Subscriber shall independently verify the accuracy and correctness of the information/data before in any way acting upon the same. MIPL shall not be liable for any harm, injury, loss or damage caused to the Subscriber due to default by the Subscriber's debtors/beneficiaries in fulfilling their obligations of any nature whatsoever. This Report or any of its portion shall not be used as a documentary evidence or otherwise before any investigative agencies or forum of law. This Report is confidential and proprietary to MIPL. The Subscriber and/or any other person(s) may not reproduce, publish or disclose any of the contents of the Report to others without the express authorization of MIPL. This Report is prepared and issued to the Subscriber without any risk, responsibility or liability on the part of MIPL or its officials.

building up contact with its clients while competing in the industry. However, it has yet to enjoy a stable market shares as it need to compete many well established players in the same field.

Investigation revealed, the Subject has penetrated into both the local and overseas market. The Subject has positioned itself in the global market and is competing in the industry. Its stable clientele base will enable the Subject to further enhance its business in the near term. We regard that the Subject's management capability is weak. Without capable management, the Subject is unlikely to be successful and often contribute to unacceptable levels of accountability. Weak management can affect productivity, profitability, sales growth and ultimately can result in the failure of a business.

As the Subject is registered as a sole-proprietorship, its financial statement are not available for analysis. As such, we are unable to ascertain the Subject's financial health. The Subject's ability to meet its obligations is very much dependent on the owner's financial strength.

The industry has reached its maturity stage and only enjoying a marginal growth. The steady growth of the country's economy will further enhance the industry activities. Thus, the Subject's future performance is very much depend on its marketing strategies in order to retain its position in the market.

Based on the above unfavourable condition, we regard granting credit to the Subject to be quite risky. Hence, credit is not recommended.

RATING EXPLANATIONS

Credit Rating	Explanation	Rating Comments
A++	Minimum Risk	Business dealings permissible with minimum risk of default
A+	Low Risk	Business dealings permissible with low risk of default
A	Acceptable Risk	Business dealings permissible with moderate risk of default
B	Medium Risk	Business dealings permissible on a regular monitoring basis
C	Medium High Risk	Business dealings permissible preferably on secured basis
D	High Risk	Business dealing not recommended or on secured terms only
NB	New Business	No recommendation can be done due to business in infancy stage
NT	No Trace	No recommendation can be done as the business is not traceable

NB is stated where there is insufficient information to facilitate rating. However, it is not to be considered as unfavourable.

This score serves as a reference to assess SC's credit risk and to set the amount of credit to be extended. It is calculated from a composite of weighted scores obtained from each of the major sections of this report. The assessed factors are as follows:

- Financial condition covering various ratios
- Company background and operations size
- Promoters / Management background
- Payment record
- Litigation against the subject
- Industry scenario / competitor analysis
- Supplier / Customer / Banker review (wherever available)
