BANGLADESH - ECONOMIC OVERVIEW

Bangladesh's economy has grown roughly 6% per year since 2005 despite prolonged periods of political instability, poor infrastructure, endemic corruption, insufficient power supplies, and slow implementation of economic reforms. Although more than half of GDP is generated through the services sector, almost half of Bangladeshis are employed in the agriculture sector, with rice as the single-most-important product.

Garments, the backbone of Bangladesh's industrial sector, accounted for more than 80% of total exports in FY 2016-17. The industrial sector continues to grow, despite the need for improvements in factory safety conditions. Steady export growth in the garment sector, combined with \$13 billion in remittances from overseas Bangladeshis, contributed to Bangladesh's rising foreign exchange reserves in FY 2016-17.

The recent influx of over 700,000 additional refugees from Burma will place pressure on the Bangladeshi government's budget and the country's rice supplies, which declined in 2017 in part because of record flooding. Recent improvements to energy infrastructure, including the start of liquefied natural gas imports in 2018, represent a major step forward in resolving a key growth bottleneck.
